### ABSTRACT (10pt)

The following article tries to looking for the relations between epistemology system of bayani, burhani, and irfani. The Bayani approach is an approach which states that scientific validity depends on the closeness or similarity between text and reality. The Burhâni's approach is made based on the process of ta'aqquli, it means reasoning thinking of abstraction to reality. Meanwhile, the irfani's approach is based on intuition and/or spiritual experience. If these three epistemologies run alone, it will have a minimal impact even the decline of Islamic civilization itself, as has been exemplified by historiography. Departing from the above problems, looking for a relationship between the three is a way out. These three epistemologies can work together and collaborate, it will have a broad impact and have greater benefits. By integrating the three(bayani, burhani, and irfani) is the best way out that Muslims need for now.As a Muslims, we can build this civilization further by integrating the three epistemologies above.

### ABSTRACT (10pt)

Type the abstract here (10 font)

The article abstract should be written in a single paragraph, using clear and readable text, and should not exceed 250 words. The abstract must include: (1) The main problem addressed by the study and the significance of the topic; (2) The objective or purpose of the research; (3) A brief mention of the approach, methods, key instruments, and research setting or case; (4) The main findings of the study or analysis; and (5) A summary of the significance of the

---

results, including theoretical or practical implications.

---

## A. INTRODUCTION

The development of [main topic or field] over the past decades has demonstrated significant dynamics, particularly within the context of [social/educational/technological/policy framework]. This phenomenon has raised a number of important issues, drawing the attention of both academics and practitioners. One prominent concern is [the core problem], which directly affects [the object of study or society at large].

### Sub-Bab

Several previous studies have attempted to address this issue from various perspectives. For instance, research by [Author's Name] (Year) found that [major prior finding]. However, most of these studies have primarily focused on [specific aspect], while the dimension of [less explored aspect] remains under-researched. This reveals a research gap that warrants further investigation.

### Sub Sub-Bab

This study seeks to fill that gap by analyzing [main focus of the research] in a more comprehensive manner. Unlike earlier research, this article adopts a [specific approach or methodology] and involves [participants/location/unique scope]. Therefore, this study is expected to offer new contributions both theoretically and practically.
