Live tab shows all active raffles:

In settings tab, please enter the following

DISPLAY NAME: any name is fine

NAME: Please enter your First and Last name, or Initials or anything to make the connection to your payment method.

DISCORD ACCOUNT: Connect discord to join the POKEMON RAFFLES Community and receive feedback in real time.

PAYMENT METHODS: This is required to host raffles. Otherwise leave blank and pay using the payment methods provided in the Raffle.

Settings

Display Name

This name appears on your payment page and raffles.

Name

Your real name, used by hosts to verify payments. Required to participate in raffles.

Discord Account

Connected as

Disconnect

Payment Methods

Default payment methods for your raffles. You can override these per raffle if needed.

PayPal

Cash App

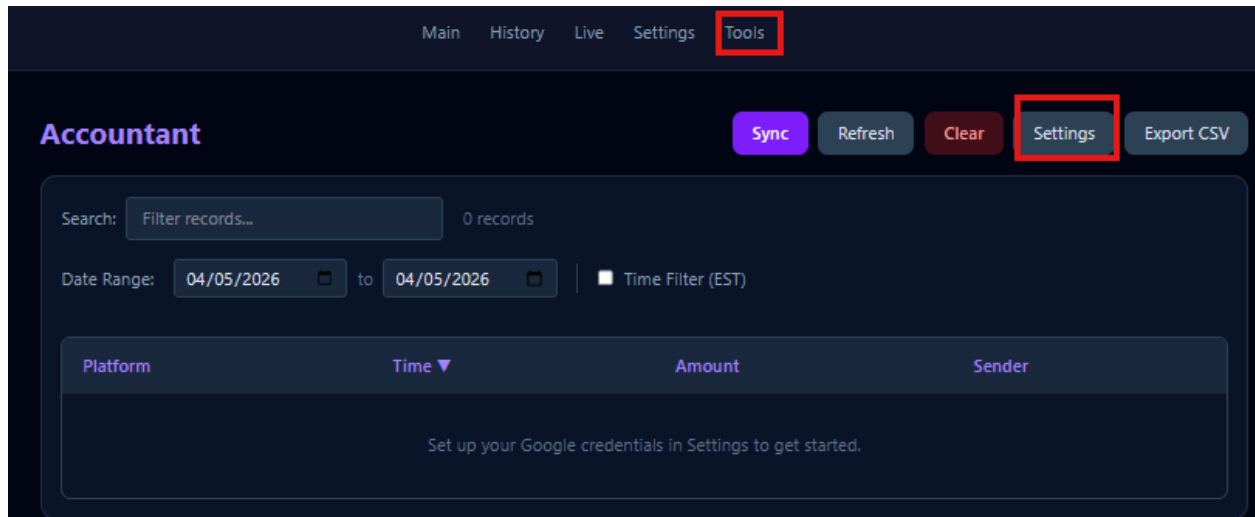

Wise

Venmo

Your payment page: chansey.gg/r/yourname

Tools tab is your one-stop spot to track payments in your raffles, it will sync the payments made to the username and real name of each person that joined your raffle. This is OPTIONAL but HIGHLY recommended.

To use the payment tracking tool, click settings and follow the guide posted below.

Accountant Settings

▶ Setup Guide

Google OAuth Credentials

Paste the contents of your Google Cloud OAuth cjson file:

```
{"installed":{"client_id":"...","client_secret":"..."}}
```

Save Credentials

Gmail Accounts

No accounts added yet.

email@gmail.com

Add

Add a Gmail account, then click **Authorize** to grant read access via Google OAuth.

Danger Zone

Clear All Records

Close

Setup guide:

Setup Guide

1. Create a Google Cloud Project

- Go to console.cloud.google.com
- Create a new project (or select an existing one)

2. Enable the Gmail API

- Go to **APIs & Services** → **Library**
- Search for **Gmail API** and click **Enable**

3. Configure OAuth Consent Screen

- Go to **APIs & Services** → **OAuth consent screen**
- Choose **External** user type
- Fill in app name, support email, and developer email
- Add scope: <https://www.googleapis.com/auth/gmail.readonly>
- Save and continue

4. Add Test Users

- On the consent screen, go to the **Test users** section
- Add every Gmail address you want to sync
- While the app is in "Testing" mode, only listed test users can authorize

5. Create OAuth Credentials

- Go to **APIs & Services** → **Credentials**
- Click **Create Credentials** → **OAuth client ID**
- Application type: **Desktop app**
- Download the JSON file (usually named `c.json`)
- Paste the contents below in "Google OAuth Credentials"

6. Authorize Each Account

- Add each Gmail address in "Gmail Accounts" below
- Click **Authorize** → **sign in** → **allow access**
- Copy the redirect URL and paste it back to complete auth
- A green ✓ means the account is ready to sync
