
 <b>DAILY LESSON LOG</b>	<b>School</b>		<b>Grade Level</b>	<b>THREE</b>
	<b>Teacher</b>		<b>Learning Area</b>	<b>MATHEMATICS</b>
	<b>Teaching Dates and Time</b>	<b>W7Q1</b>	<b>Quarter</b>	<b>FIRST</b>

	Monday	Tuesday	Wednesday	Thursday	Friday
<b>I. CURRICULUM CONTENT, STANDARDS, AND LESSON COMPETENCIES</b>					
<b>A. Content Standards</b>	The learners should have knowledge and understanding of whole numbers up to 10 000.				
<b>B. Performance Standards</b>	By the end of the quarter, the learners are able to represent, round, compare, and order numbers up to 10 000.				
<b>C. Learning Competencies and Objectives</b>	The learners round numbers to the nearest tens, hundreds, or thousands.				
	At the end of the lesson, the learners should be able to round numbers to the nearest tens.	At the end of the lesson, the learners should be able to round numbers to the nearest hundreds.	At the end of the lesson, the learners should be able to round numbers to the nearest thousands.	At the end of the lesson, the learners should be solve problems involving rounding numbers to the nearest tens, hundreds, or thousands.	At the end of the lesson, the learners should be solve problems involving rounding numbers to the nearest tens, hundreds, or thousands.
<b>D. CONTENT</b>	Round Numbers to the Nearest Tens	Round Numbers to the Nearest Hundreds	Round Numbers to the Nearest Thousands	Round Numbers	Round Numbers
<b>II. LEARNING RESOURCES</b>					
<b>A. <div>B. Lesson Purpose/Intention</div> <div>ENGAGE</div>	<div>At the end of the lesson, the learners should be able to round numbers to the nearest tens.</div>	<div>At the end of the lesson, the learners should be able to round numbers to the nearest hundreds.</div>	<div>At the end of the lesson, the learners should be able to round numbers to the nearest thousands.</div>	<div>At the end of the lesson, the learners should be solve problems involving rounding numbers to the nearest tens, hundreds, or thousands.</div>	<div>At the end of the lesson, the learners should be solve problems involving rounding numbers to the nearest tens, hundreds, or thousands.</div>																																																																																										
<div>C. Lesson Language Practice</div> <div>ENGAGE</div>	<div>Read the following words: rounding, approximate or round number, greater than, less than, equal to, number line, nearest tens, rounding up, rounding down</div> <div>Present the following situation.</div> <div>The table below shows the number of fruits being sold in a fruit stand.</div> <div>Let us round the numbers to the nearest tens and estimate the total number of fruits.</div>	<div>Read the following words: rounding, round number, greater than, less than, equal to, nearest hundreds, rounding up, rounding down</div> <div>Tell the learners that today they will learn how to round numbers to the nearest hundreds.</div> <div>Give examples on rounding numbers to the nearest tens. Write the following number on the board.</div>	<div>Read the following words: rounding, round number, greater than, less than, equal to, nearest thousands, rounding up, rounding down</div> <div>Tell the learners that so far they learned how to round numbers to the nearest tens and nearest hundreds.</div> <div>Today, learn how to round numbers to the nearest thousands.</div> <div>Give examples on rounding numbers to the nearest hundreds.</div>	<div>Read the following words: rounding, round number, greater than, less than, equal to, nearest tens, hundreds or thousands, rounding up, rounding down</div> <div>Inform the learners that today they will apply their understanding of rounding numbers to solve problems.</div> <div>This lesson will show the importance of selecting the appropriate rounded</div>	<div>A. Study the number line. Read the number labels.</div> <div></div> <div>1. Find the point for number 14. In which tens is 14 closer to? 10 or 20? ____</div> <div></div> <div>2. In which hundreds is 260 nearer, 200 or 300? ____</div> <div>Can you find the connection between the position of numbers in a number line and rounding off numbers? Did you find</div>																																																																																										

			Write the number on the board.	numbers in some situations. Present Situation 1. Situation 1 Marie wants to buy a bag and a pair of slippers. Can she buy both if she has ₱700.00?	it difficult in answering the items in B?
<b>D. Reading the Key Idea/Stem</b> <b>EXPLORE</b>	Post a number line as shown below. Prepare this beforehand. Ask the learners to count by 10s from 10 to 100.	Write on the board a 3-digit number, say 278. Say that we will round this number to the nearest hundreds. What is the ones digit? What is the tens digit? What is the hundreds digit? What is the thousands digit?	When rounding the number to the nearest hundreds, we look at the tens digit. What is the tens digit?	Ask the learners to round each price to the nearest hundreds and explain their answers. Then, have them find the rounded total amount.	Let us go back to item no. 1 in Activity 1. Using the number line, when we round off 14 to the nearest tens, the answer is 10 since 14 is nearest to 10 than 20. Applying the rules in rounding off: Step 1: The digit to be rounded off is 1 since it is in the tens place. Step 2: The digit to its right is 4. Step 3: 4 is below 5. So, we will retain 1. Step 4: Change all the digits to the right of 1 to 0. Answer: 10
<b>E. Developing Understanding of the Key Idea/Stem</b> <b>EXPLORE</b>	Direct learners' attention to the completed table. Ask the learners to find the actual total sum and the rounded total sum. Assist them if they have difficulty finding the sums. Have them compare the two sums.	How do we round numbers without using the number line? Post the rules in rounding to the nearest hundreds.	How do we round numbers without using the number line? Post the rules in rounding to the nearest thousands.	Ask the learners to round each number to the nearest tens and explain their answers. Then, have them find the rounded total amount. Direct learners' attention to the rounded numbers obtained.	Round off the given numbers to the place value of the underlined digit. 1. 948 _____ 2. 753 _____ 3. 52 083 _____ 4. Six thousand, four hundred twenty-five (number _____ in words) _____ 5. Eight thousand ninety-six (number _____ in words) _____
<b>F. Deepening Understanding of the Key Idea/Stem</b> <b>EXPLAIN</b>	Present the table below, which shows the results from the earlier discussion.	Round each given number to the indicated place value	Have the learners work in pairs. Distribute to each pair LAS 2.	Have the learners work in pairs. Distribute to each pair LAS 3.	Uncle Ben spent his vacation in Mati City for 155 days. Rounded to the nearest tens,

	Direct learners’ attention first to the numbers rounded down (shaded cells).	<table><tr><th>Given Number</th><th>Nearest Hundreds</th><th>Nearest Tens</th></tr><tr><td>446</td><td></td><td></td></tr><tr><td>208</td><td></td><td></td></tr><tr><td>672</td><td></td><td></td></tr><tr><td>755</td><td></td><td></td></tr><tr><td>824</td><td></td><td></td></tr></table>	Given Number	Nearest Hundreds	Nearest Tens	446			208			672			755			824			Give them enough time to complete the worksheet. Have a class discussion afterward.	Give them enough time to complete the worksheet. Have a class discussion afterward.	about how many days did Uncle Ben spend his vacation in Mati City?
