

We want to :

- Establish spaces for org leaders, stuco reps, and passionate individuals to work on campus issues together.
 - **By bringing like leaders/orgs/individuals in conversation and working together to develop plans.**
- Build coalitions to pursue effective change with effective strategy.
 - **By spending time discussing and critiquing strategies before seeking group approval**
 - **By working towards popular student support.**
- Design many ways to get involved for people with different levels of passion and commitment.
 - **By inviting individuals to join the coalitions through avenues like direct leadership, soliciting indirect feedback, letter signing, surveys, email communication, etc.**
- Remain self-reflexive, admitting when we make mistakes and working hard to avoid them proactively.
 - **By explicitly inviting critique and reflection from many sources**
- Maintain good faith, collaborative opportunities for disagreement and critique without giving way to dogpiling and silencing.
 - **By echoing group norms around accountability both for groups and individuals.**
