

CARDBOARD BOAT RACE

1. Notes from Research. What characteristics you liked the most of different boats? What you noticed didn't work?

Then Draw the front Side and Top view with Dimensions, and Calculate your Density to prove it will FLOAT.

You need to Research at least 3 years of strengths and weaknesses of builds.

2. Draw a Diagram of your boat with measurements in cm.

TOP VIEW:

SIDE VIEW:

FRONT VIEW:

4. SHOW ALL WORK TO CALCULATE VOLUME:

List All contributions to Mass:

- _____
- _____
- _____
- _____
- _____

Total Mass:

Solve for Density. Will it float? If not REDO!

5. List at least 2 things you are doing to make the base of your boat super strong and solid enough to handle being strong under the weight. _____/40

1. _____

2. _____

6. Explain your strategies of how to best load and unload boat to keep from sinking right off the bat.

_____/10

6. Did your boat survive intaked?

REMEMBER IF YOU LEAVE ANY CARDBOARD IN THE POOL,
YOUR SCORE IS A ZERO.
