

Infra-red Sauna Dome lined with...

Tourmaline

One of few gemstones that naturally emits negative ions that have positive benefits for the body. This is because this wondrous stone has the ability to generate its own electrical charge when it is heated. Tourmaline can strengthen the nervous system, the blood, and the lymph. It can also offer great relief from migraines and headaches.

It can enhance your stamina and physical vitality. It can also help with healing skin disorders. Tourmaline can also work great with your weight loss efforts and with the reduction of cellulite.

It helps to strengthen you against illness and injury in the first place, as much as it hastens your recovery following a bout of sickness or poor health.

Jade

Containing more than 30 types of trace mineral elements such as calcium, magnesium, zinc, nickel, copper, selenium, and more. The JADE STONE assists in our body's vital organs and discharges toxins naturally.

Promotes blood circulation, healthy metabolism, and bone and muscle nourishment. Individuals who interact with JADE also notice clearer sight, sharper hearing, and healthier skin. JADE is also believed to slow down the process of cell aging and enhances the body's IMMUNITY STRENGTH.

Germanium

Boosts the immune system response. It is sited as aiding the body in producing natural killer cells and helping with the oxygenation of cells both of which are beneficial in fighting off bacteria and infections. It's often used to reverse AIDS, cancer, and other degenerative diseases including arthritis and Lyme disease. boost energy and rejuvenate the immune system as well as fight off free radicals that cause aging and decay in the cells.

What if I told you that you can control the amount of toxins within your body by eliminating unhealthy, excess toxins?

And THIS IS how and why! 😊

NATURE NEEDS NATURE TO SUSTAIN LIFE. We were designed, by nature, to exist in a state of consistent and constant contact with the surface of the Earth 🌍 to absorb the electrons on the surface of the Earth. These electrons serve as mechanical antioxidants. Because the body is self-preserving, it can heal itself if given the right conditions. These conditions being; far-infrared mixed with our own thermal heat in contact with SPECIFIC elements of the Earth.

There are 13 minerals found on Earth that are found to reflect back far-infrared radiation. Our skin, which happens to be our body's solar panel, is photo-receptive and triggers and signals different wave-forms of light, signaling different physiological processes in the body. By introducing far-infrared to the body, it then signals each cell that is exposed to this radiation to take its mitochondria and to enhance the production of ATP (fuel of the body) by as much as 32 times. This enhanced energy source to the mitochondria, enhanced oxygenation, enhanced circulation, enhanced energy can only make you feel fully charged because you have reduced inflammation by absorbing all of these electrons. Energy always pushes from a higher energy potential to a lower energy potential. It happens passively and naturally EVERYWHERE in nature. When your thermal body is in contact with minerals/electron donors, your body heat activates these crystals causing these crystals to radiate this specific wave-form of light (far-infrared) that the skin (photoreceptor cells) gets the signal to push out more ATP. This awakens the atom with energy. When a damaged tissue in one area needs more energy than a healthy tissue in a different area, some of this extra energy is then taken from this good tissue that seems to have come out of nowhere and is thrust into the damaged tissue. This reduces the inflammation and promotes our body's natural healing processes to take place.

Since we can't spend our time laying on the ground or walking barefoot, I have that problem covered...

Ladies and gentlemen, ...

* It can be as easy as lying on an infra-red, mineral-lined bed. Jade with its 30 trace minerals, Tourmaline, and Germanium provide a jolt of healing for the whole-body.

Boosting cell restoration and removing disease-causing toxins from the body is critical for the body in our present toxin-abundant lifestyle.
