

Technology as a tool for art and design and it's application in any classroom situation

Presented by Steve Tootell

Details of 20 minute Discovery Session

Presentation of an overview of how I use contemporary technology, "freePhotoshop"/ free web design soft/ free graphic design software/ free go pro video editing software / using data projections. Generally using freely available software in my ceramics studio and how these interactive platforms can also be applied to any classroom situation.

Details of DEEP Dive 50 minutes, Challenges

This will compromise of a hands on a multi- platform laptop/desk top based exploration of contemporary technology in the ceramics classroom and how all of it could be applied to any classroom situation using freely available software to create high end design products/posters/presentations and of course for participants to experience a modicum of practical art.
