

Tab 1

For the past 10 weeks i have been learning and taking my time to buld a desk top for my desk and i have learned to sand ,stain,cut the right measurements and take my time this was and easer project but it still took time right measurements pisces to build it and then stain it it probably shouldnt have taken me ten weeks but i wasnt in a rush but i am currently working on clear coding it in the stain room and just getting everything soothed and ready to go home and start my next project this project was fun and kinda challenging i will continue to work harder and make everything look nice as possible with evry project i do and keep having fun most importantly.

for the past 5 weeks i have been working on a self that i am currently cutting and getting all the pisces for the building for my project and i will continue to work and keep building my shelve for my room and then put it together im getting closer each day.

november 21 /25

For the past three weeks, i have been working on a new project. I am building a gaming desk and this;prproject will take me ten weeks i think to get pretty close to finishing but i will learn to joint add a cool details and to take my time during this time and just try to do my best as i can and make sure if i mess up to fix it ive learned to be more patient and not so much in a rush to get it done ive learned alot of new stuff so im making this project more challenging for me and to try different things and hope it turns out well. And continue to learn and try new things and build cool stuff that I will use in the future.
