

EMAIL SWIPE #1

**Subject Line: Launch 10 YouTube Channels Today (GPT-6 Astra Does All Of It)
Type ONE Sentence → Get A Full**

Hey,

What if you could type one word...
And 60 seconds later have a complete YouTube channel?

Then do it again. And again. Until you own TEN.

 **Introducing: Ai YouTube Multi-Channel Builder — Powered By GPT-6 Astra**

OpenAI released GPT-6 Astra days ago and the headlines called it a taste of AGI.
It scored 99.9% on ARC-AGI-3 — human parity on 96% of levels.
But here is the part that matters to you:

👉 Astra does not just generate. It completes entire multi-step jobs on its own — 47% faster than the model before it.

So we pointed it at YouTube. Here is what it does while you watch:

- Researches the niche, the competition and the winning topics
- Builds the channel — name, logo, banner, description, keywords
- Writes every script — hook, body and call to action
- Generates the voiceover in a natural human voice
- Matches footage, adds captions, music and transitions
- Designs the thumbnail and writes the title, description and tags
- Renders long-form AND the Shorts version together
- Uploads and schedules it — with a single click

==> See Ai YouTube Multi-Channel Builder In Action

And then you do it again. There is no channel limit.

1 channel or 50 — same dashboard, same 60 seconds, same price.

Think about it:

One faceless channel used to eat 15–25 hours a week.

👉 Now ten channels take ten minutes and zero manual work.

But the launch price is increasing soon...

👉 Grab your one-time access here

Best,

[Your Name]

EMAIL SWIPE #2

Subject Line: 🤖 Your AI Video App Makes Clips. This Builds Channel NETWORKS. Type ONE Sentence → Get A Full

Hey,

Every AI video tool does the same thing.
It generates a clip... and hands the rest back to you.

You still research. You still write. You still thumbnail. You still upload.

👉 The AI did about 10% of the job.

And that is exactly why you are still stuck on ONE channel.

🔥 **Ai YouTube Multi-Channel Builder Does All 100% — Across Unlimited Channels**

Because a channel was never one task. It is a chain of twelve:

- Research the niche
- Find the topics
- Write the script
- Generate the voiceover
- Match the footage
- Add captions, music and transitions

- Design the thumbnail
- Write the title, description and tags
- Render long-form AND Shorts
- Upload and schedule it

Older AI could never hold a chain that long. It forgot halfway through.

👉 **GPT-6 Astra changed that. It holds long-horizon context — a whole job, start to finish, without losing the thread.**

Which is the ONLY reason one person can now run ten channels at once.
Astra keeps channel #1 and channel #10 straight at the same time — different niches, different voices, different schedules.

==> Watch It Build A Channel In 60 Seconds

You type a niche. It does the other eleven steps.
Then you launch the next channel.

👉 Watch the demo here

EMAIL SWIPE #3 (Mail AT 3PM EST)

Subject Line: 🎬 **A Full YouTube Team — For Every Channel You Own Type ONE Sentence → Get A Full**

Hey,

Imagine having a niche researcher, a scriptwriter, a voice actor, an editor, a thumbnail designer, an SEO specialist and an uploader...
Working on TEN channels at once. For free.

Sounds crazy, right?

GPT-6 Astra just made it possible.

🚀 **Breakthrough: One Niche — One Finished Channel — Repeat Unlimited Times**

Ai YouTube Multi-Channel Builder turns a single word into:

- A complete channel with name, logo, banner and SEO description

- A full queue of finished videos — voiceover, captions and music included
- Click-tested thumbnails on every single video
- Titles, descriptions, tags and chapters written for you
- Long-form AND vertical Shorts, rendered together
- A 90-day content calendar, scheduled and posting automatically

👉 And then it does the whole thing again for your next channel. And your next.

==> Watch Ai YouTube Multi-Channel Builder In Action

This was impossible before Astra. Older models drifted after a few steps — fine for one clip, useless for running a network.
Astra completes the entire job, on every channel, without supervision.

If you have ever wanted faceless channels that actually run themselves, this is worth 2 minutes.

[Your Name]

EMAIL SWIPE #4 (Mail AT 7PM EST)

Subject Line: 📢 They Charge Per Channel. We Charge Once. (GPT-6 Astra Inside) Type ONE Sentence → Get A Full

Hey,

Something big just happened in the faceless YouTube world...

📢 One App Now Replaces Your Entire Content Stack — On Unlimited Channels

Ai YouTube Multi-Channel Builder gives you:

- AI video generation powered by GPT-6 Astra
- AI voiceover with voice cloning in 30+ languages
- Automatic thumbnails, titles, descriptions and tags
- Millions of stock clips plus AI-generated visuals
- One-click publishing to unlimited channels
- 500+ prebuilt templates — all in one dashboard

All for a one-time payment.

==> See Ai YouTube Multi-Channel Builder In Action

Which means you no longer need to pay:

- \$30–\$100/month for an AI video tool
- \$20–\$50/month for AI voiceovers
- \$15–\$40/month for thumbnail and design software
- \$25–\$80/month for a scheduling platform
- \$20–\$60/month for stock footage and music

That is \$110–\$330 EVERY month... gone.

And here is the part nobody mentions: most of those tools bill you PER CHANNEL.

Ten channels means ten times the bill. Every month. Forever.

👉 This one never charges per channel. Launch 1 or 50 — the price never changes.

And you would STILL be doing the research and uploading yourself with those tools. Here? You type one niche. Astra does everything.

👉 Watch the demo here

Best,
[Your Name]

EMAIL SWIPE #5 (Mail AT 10PM EST)

Subject Line: This Replaced An Entire Content Team — On Every Channel At Once Type ONE Sentence → Get A Full

Hey,

Most AI video apps give you a clip and call it content.
Then leave the hard part to you — which is why you never got past channel one.

This one gives you the finished channel. Including the uploads. Then the next channel.

Here is what running ONE faceless channel used to cost:

- Scriptwriter: \$50–\$150 per video
- Voiceover artist: \$30–\$100 per video
- Video editor: \$100–\$400 per video
- Thumbnail designer: \$20–\$80 per video

- Or 15–25 hours a week doing it all yourself

Now multiply every line by ten channels. That is why nobody builds a network.

GPT-6 Astra Does All Of It — 60 Seconds Per Channel

With Ai YouTube Multi-Channel Builder you get:

- Unlimited channels from one dashboard
- Automatic niche and topic research on every one
- Scripts, voiceovers, footage, captions and music
- Thumbnails, titles, descriptions and tags
- Long-form and Shorts rendered together
- One-click upload and auto-scheduling across your whole network
- Commercial rights so you can do this for clients

==> Watch How It Works

Perfect for:

- Faceless creators building a channel network instead of one channel
- Agencies and freelancers selling done-for-you YouTube
- Marketers who want traffic without being on camera
- Anyone charging \$500–\$3,000 to set up channels for clients
- Anyone who has been "about to start a channel" for two years

Ten channels no longer costs ten times the work.

👉 It costs one more click.

👉 Check it out here

Best regards,
[Your Name]

EMAIL SWIPE #6 (Mail NEXT DAY AT 11AM EST)

**Subject Line: Why Creators With 30 Channels Beat Creators With One Type
ONE Sentence → Get A Full**

Hey,

Quick question.

Do you know why most faceless creators never make real money?

It is not talent. It is not luck.

👉 It is VOLUME.

One channel is a lottery ticket.
Thirty channels is a business.

Here is why:

- Every channel is a separate shot at the algorithm
- If one flops, the other twenty-nine keep running
- Each channel can target a different niche and a different CPM
- A winner can be cloned into new niches and new languages
- And every monetized channel is an asset you can eventually sell

Look at who actually wins on YouTube. None of them run one channel.
WatchMojo has MsMojo, WatchMojo UK and Unveiled.
CoComelon runs dozens of language versions.
MrBeast has Beast Reacts, MrBeast Gaming and 30+ language channels.

They do not run channels. They run NETWORKS.

🔴 **So Why Does Almost Nobody Copy Them? One Reason: TIME**

A network means publishing constantly, on every channel.
That was impossible when one channel ate 15–25 hours a week. So people hired teams — or gave up.

That bottleneck just disappeared.

👉 GPT-6 Astra holds long-horizon context — it keeps ten different niches, voices and schedules straight at the same time, without losing track.
One person can now run what used to take an entire company.

==> See Ai YouTube Multi-Channel Builder In Action

With Ai YouTube Multi-Channel Builder you can:

- Launch a complete channel every 60 seconds
- Run unlimited channels from one dashboard
- Let Astra research, write, create and upload on all of them
- Clone a winning channel into 30+ languages
- And do it all without touching an editor

While everyone else is still setting up channel one...

👉 You have already launched thirty.

👉 Grab it at the launch price here

Best,
[Your Name]

(Channel examples are publicly reported third-party estimates, shown for illustration only. Earnings depend on niche, consistency, competition and marketing. Results are not typical or guaranteed.)

EMAIL SWIPE #7 (Mail AT 3PM EST)

**Subject Line: What If Every Channel You Owned Ran Itself? Type ONE Sentence
→ Get A Full**

Hey,

What if you never paid an editor, a voice actor or a thumbnail designer again?
On any channel. On all of them.

Imagine typing "unsolved historical mysteries for late-night viewers"...
And 60 seconds later having a finished, branded, publish-ready channel.

Then typing a second niche. And a third. And a tenth.

Ai YouTube Multi-Channel Builder — Powered By GPT-6 Astra

Astra is the first model that can run a twelve-step job end to end without supervision.
So on every channel you own, it can:

- Research the niche and pick the winning topics for you
- Write every script with hooks built for retention
- Voice it with hundreds of natural voices — or clone your own
- Build the video with matched footage, captions and music
- Design the thumbnail and write the full SEO package
- Publish to YouTube — long-form and Shorts — in one click
- Then repeat all of it on your next channel, automatically

==> Watch the demo here

And it covers every profitable format:
Facts. Stories. Documentaries. Explainers. Top-10s. Shorts. Kids. Relaxation.

One niche per channel. Unlimited channels. Zero work from you.

👉 Check it out here

Best,

EMAIL SWIPE #8 (Mail AT 7PM EST)

Subject Line: ⚠️ Price Increasing Soon — Unlimited Channels, One Small Payment Type ONE Sentence → Get A Full

Hey,

Quick heads up...

The launch price for Ai YouTube Multi-Channel Builder is about to increase.

If you have been thinking about grabbing it, now is the best time.

 **One Niche — A Full Channel — Unlimited Times — One-Time Price**

This brand-new platform gives you:

- Complete YouTube channels launched in 60 seconds each
- UNLIMITED channels from a single dashboard — no per-channel fee
- GPT-6 Astra doing the research, scripting and creation on every one
- AI voiceover, voice cloning and 30+ language dubbing
- Long-form and Shorts rendered together, uploaded in one click
- 500+ prebuilt templates plus automatic thumbnails and SEO
- Commercial rights for client work

All without monthly fees.

==> See Ai YouTube Multi-Channel Builder Here

No subscriptions.

No channel limits.

No juggling five different tools.

And one more thing worth saying out loud:

👉 GPT-6 Astra has only been public for days. Most creators are still running tools built on models two generations behind — still doing 90% by hand, still stuck on one channel.

You are early. That window does not stay open long — and neither does this price.

👉 Grab it before the price increases

Best,
[Your Name]

EMAIL SWIPE #9 (Mail NEXT DAY AT 11AM EST)

Subject Line: Last 5 Copies — Unlimited Channels At The Launch Price Type ONE Sentence → Get A Full

Hey,

Quick update...

There are now only 5 licenses left for Ai YouTube Multi-Channel Builder at the launch price.

Once those are gone... the offer closes.

If you missed it earlier, here is what makes this different.

 **The GPT-6 Astra App That Builds AND Runs Unlimited YouTube Channels**

You get instant access to:

- Complete channel creation in 60 seconds — unlimited channels, no per-channel fee
- Astra-powered niche, topic and keyword research on every channel
- Full video generation with voiceover, captions and music
- Automatic thumbnails, titles, descriptions and tags
- Long-form plus Shorts, published with one click
- 30+ language dubbing — clone one winning channel into ten

Plus commercial rights so you can sell everything you create.

==> Watch Ai YouTube Multi-Channel Builder Here

No monthly fees. No editors. No uploading by hand.

Just pick a niche, launch a channel... then do it nine more times.

But again...

⚠️ Only 5 licenses remain.

👉 See if you can still grab one here

Best,

EMAIL SWIPE #10 (Mail AT 11PM EST)

Subject Line: 🚨 Last Chance — Unlimited YouTube Channels (Closing In 1 Hour) Type ONE Sentence → Get A Full

Hey,

This is your final reminder.

The launch deal for Ai YouTube Multi-Channel Builder closes in less than 1 hour.

After tonight, the special launch price disappears...
And may switch to a monthly subscription.

If you missed the earlier emails, here is what makes this platform different.

🚨 One Niche — A Finished Channel — Unlimited Times, Powered By GPT-6 Astra

You get one-time access to:

- UNLIMITED YouTube channels, launched in 60 seconds each
- GPT-6 Astra running the research, scripting and creation
- AI voiceover, voice cloning and 30+ languages
- Automatic thumbnails, titles, descriptions, tags and chapters
- Long-form and Shorts rendered together
- One-click upload, scheduling and a 90-day content calendar
- 500+ prebuilt templates and full commercial rights

==> Lock In Your One-Time Access Here

Think about it:

One month of a single AI video tool costs more than this entire platform — and most of them bill you per channel.

This replaces five of them, plus your editor, your voice actor and your thumbnail designer...

👉 Across every channel you will ever launch.

Tomorrow you are either running a network... or still planning channel one.

👉 Grab it before midnight

Best,
[Your Name]
