

Fodder Dust

(from Dragon Magazine #178)

This is the solution to many logistical problems. A single pinch of this magical dust added to a gallon of water balloons out into a heap of vegetable fodder sufficient to feed 30 horses or the equivalent for a day. It usually comes in a small, flat box of $3d4+1$ pinches. A single dry pinch, if consumed inadvertently, expands to kill the imbiber in gruesome fashion; save vs. death magic at +1 or die.
