

Publications on Embioptera Behavior *by J.S. Edgerly and co-authors (undergraduate co-authors*)*

Edgerly, J.S. 1987. Maternal behavior of a webspinner (Order Embiidina). *Ecological Entomology*. 12: 1-11.

Edgerly, J. S. 1987. Colony composition and some costs and benefits of facultatively communal behavior in a Trinidadian webspinner (Embiidina: Clothodidae). *Annals of the Entomological Society of America*. 80: 29-34.

Edgerly, J. S. 1988. Maternal behaviour of a webspinner (Order Embiidina): mother–nymph associations. *Ecological Entomology*. 13: 263-272.

Edgerly, J. S. 1994. Is group living an antipredator defense in a facultatively communal webspinner? *Journal of Insect Behavior*. 7: 135-147.

Edgerly, J. S. 1997. Life Beneath Silk Walls: A Review of the Primitively Social Embiidina. Chapter in *The Evolution of Social Behavior in Insects and Arachnids*, (Eds. J. Choe and B. Crespi). Cambridge University Press.

Edgerly, J. S., J. A. Davilla*, and N. Schoenfeld*. 2002. Silk spinning behavior and domicile construction in webspinners. *Journal of Insect Behavior*. 15: 219 - 242.

Edgerly, J. S. and E. C. Rooks. 2004. Lichens, sun, and fire: a search for an embiid-environment connection in Australia (Order Embiidina: Australembiidae and Notoligotomidae). *Environmental Entomology*. 33(4):907-920

Edgerly, J. S., A. Tadimalla*, and E. P. Dahlhoff. 2005. Adaptation to thermal stress in the lichen-eating webspinners (Embioptera): habitat choice, domicile construction and the potential role of heat shock proteins. *Functional Ecology*. 19:255-262.

Edgerly, J. S., S. M. Shenoy*, and V. G. Werner*. 2006. Relating the cost of spinning silk to the tendency to share it for three embiids with different lifestyles (Order Embiidina: Clothodidae, Notoligotomidae, and Australembiidae). *Environmental Entomology*. 35: 448-457.

Edgerly, J. S., Sebastian Büsse*, T. Hörnschemeyer. 2012. Spinning behaviour and morphology of the spinning glands in male and female *Aposthonia ceylonica* Enderlein, 1912 (Embioptera:Oligotomidae). *Zoologischer Anzeiger - A Journal of Comparative Zoology*. Doi:10.1016/j.jcz.2011.12.006. (* mentor Hörnschemeyer)

Proaño, C. B.*, S. Cruz*, D. M. McMillan, J. S. Edgerly. 2012. Exploration of substrate vibrations as communication signals in a webspinner from Ecuador (Embioptera: Clothodidae). *Neotropical Entomology*. DOI 10.1007/s13744-012-0034-z. Appeared online 4 May 2012.

Dejan, K. A.*, J. M. Fresquez*, A.M. Meyer*, J. S. Edgerly. 2013. Maternal territoriality achieved through shaking and lunging: an investigation of patterns in associated behaviors and substrate vibrations in a colonial embiopteran, *Antipaluria urichi*. *Journal of Insect Science*. 13. Article 82 (<http://www.insectscience.org>)

Büsse, S., T. Hörnschemeyer, Hohu, K*, D. McMillan, J. S. Edgerly. (2015). The spinning apparatus of webspinners-functional-morphology, morphometrics and spinning behaviour. *Scientific Reports*. 5:9986. DOI: 10.1038/srep09986.

McMillan, D., K. Hohu*, J. S. Edgerly. (2016). Choreography of silk spinning by webspinners (Insecta: Embioptera) reflects lifestyle and hints at phylogeny. *Biological Journal of the Linnean Society*. 118: 430–442, <https://doi.org/10.1111/bij.12749>

Kelly, E. T.*, Whittall, J. B., & Edgerly, J. S. (2018). Resolving two *Haploembia* (Embioptera: Oligotomidae) cryptic species: molecular data confirms parthenogenetic females can be distinguished by their antisocial behavior. *Zootaxa*, 4504(2), 225-242.

Edgerly, J. S. (2018). Biodiversity of Embiodea. *Insect biodiversity: science and society*, 2, 219-244.

Büsse, S., Büscher, T. H., Kelly, E. T.*, Heepe, L., Edgerly, J. S., & Gorb, S. N. (2019). Pressure-induced silk spinning mechanism in webspinners (Insecta: Embioptera). *Soft matter*, 15(47), 9742-9750.

Edgerly, J. S., Sandel, B., Regoli, I.*, & Okolo, O.* (2020). Silk spinning behavior varies from species-specific to individualistic in Embioptera: do environmental correlates account for this diversity? *Insect Systematics and Diversity*, 4(2), 2. <https://doi.org/10.1093/isd/ixaa007>

Shenoy, S.*, Ing, K.*, Barber Jr, R. P., Rooks, E. C., & Edgerly, J. S. (2020). A Multiscale characterization of two tropical embiopteran species: nano-and microscale features of silk, silk-spinning behavior, and environmental correlates of their distributions. *Environmental Entomology*, 49(5), 1242-1251.

Edgerly, J.S. (2022). Dispersal risks and decisions shape how non-kin groups form for a tropical silk-sharing webspinner (Insecta: Embioptera). *Frontiers in Ecology and Evolution*, section Social Evolution. <https://doi.org/10.3389/fevo.2022.727541>

Morinaga, G., Soghigian, J. and Edgerly, J.S. (2023). Macroecology and potential drivers of diversity in webspinner maternal care (Order Embioptera). *Insect Systematics and Diversity*, 7(1), p.1. <https://doi.org/10.1093/isd/ixac031>

Büscher, T.H., Harper, J.R., Sripada, N., Gorb, S.N., Edgerly, J.S. and Büsse, S., 2023. Morphological and behavioral adaptations of silk-lovers (Plokiophilidae: Embiophila) for their lifestyle in the silk domiciles of webspinners (Embioptera). *Diversity*, 15(3), p.415. <https://doi.org/10.3390/d15030415>

Decker, B. L., S.C. Chaney, J. Angus, C. Chalmers, J.S. Edgerly, A. Lindemann, B.G. Merkle, L. Schonberg, T. Snyder. 2024. Art is Science is Art: Strengthening Connections Between Entomology and the Arts. *American Entomologist*. 70(1); 50-59.

Arias, Emily A *, Andrew M Schatz*, Soondree E Kliefoth*, Edward C Rooks, Janice S Edgerly, 2024. A history of susceptibility to parasites and divergence in solitary, gregarious and agonistic behaviors of embiopterans, *Environmental Entomology*, 53(6): 921–934, <https://doi.org/10.1093/ee/nvae08>
