

OSSA, GREECE:

1. Help them clean the waters with buckets
2. Make a house for them
3. Plant flowers they like to feed them

FRANCE : It's a pity especially because this happens after summer ! In summer they collect nectar and produce honey for the winter season. During winter they will use their honey to keep a warm atmosphere that will help the babies to be alive till spring and to stay alive. Now they don't have honey anymore and probably no eggs or larvae ! The only solution that could help is to create biodiversity hives. That means buildings small hives to host the bees that are still alive (with the queens otherwise no baby !) and let them keep all the honey they could still make. Let them do what they can and don't touch them. But will they be able to find plants with nectar ? We need more information ! Plant some flowers that grow very quick !

You can use this plan to build a new house for them. Put it at 30 cm from the floor :

12th Veria's Kindergarten / O

1. We can make new hives
2. We can repair the damaged hives
3. We can paint their hives so as to be more colourfull

12th Veria' s Kindergarten

Kindergarten of Kentri(class 1)

Τι μπορούμε να κάνουμε για να σώσουμε τις μέλισσες της Καρδίτσας;

1. Να της φτιάξουμε νέα κυψέλη
2. Να τις προστατέψουμε
3. Να φυτέψουμε λουλούδια για να πάρουν τη γύρη
4. Να τους φτιάξουμε σπίτι για να ζούνε

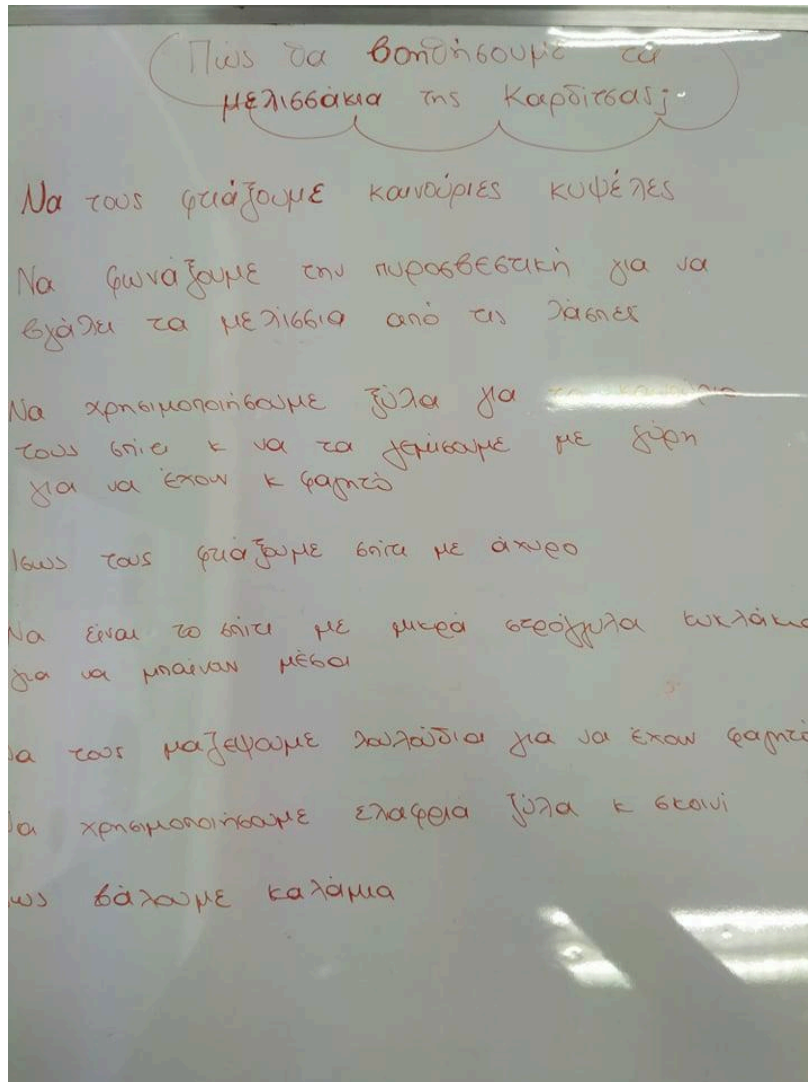

Kindergarten of Kentri (class2)

How can we help the Karditsa bees from floods?

- We can build new hives for them
- Call the fire department to save them from the mud.
- We can use sticks for the new home and fill them with flowers
- Maybe we could use straw
- We should make them little circles so they can get inside
- We can use rope
- Maybe we can use reeds

14th Serres Kindergarten

- * να βγάλουμε τα νερά από τα σπίτια τους
- * να καθαρίσουμε τα σπίτια τους
- * να τους πάμε φαγητό και ρούχα
- * να κρεμάσουμε τις κυψέλες ψηλά στα δέντρα για να μην πλημμυρίσουν.
