

Training - Exploring

Hi there! You want to train your skills as an explorer? Then you are on the right page!
To begin your basic training you need to be at least Lipkes rank!

Step One:

Finish any three of the following prompts to complete your basic explorer training

Backpacker

To become a skilled explorer you need to visit a lot of different habitats of course.
But beware! Not every Saliko can enjoy the same view!

→ check out which Subspecies can gain the achievement before you throw a Tundra into a volcano!

→ You can gain multiple of these achievements as long as it fits the subspecies.

Dreamer

Yes - exploring your own dreams is also part of the experience!
Well, as long as you can remember what you dreamt about...

Tasty

Finding exotic fruits takes a lot of effort! Search your environment carefully and you might find a tasty treat!

Wet

You found water - in some habitats it's not that easy but every explorer knows water is existential!

Co-existence

Not every animal in Ibea is prey or dangerous!
As a good explorer you have already met one of these, right?

Useful Herbs

You found some herbs or plants! Always good to know what's useful and where to get it!

Underground

You entered a cave - I hope you know how to navigate in the dark!

Student

You can learn a lot from more experienced Salikos. Listen to their stories, watch them closely or let them show you a few tricks. Whatever you do you can certainly learn something from them. For this you can use an NPC or another Saliko who has already completed the basic exploring training.

Requirement:

Fullbody, Colored, Shaded, Background or 1500 words

Additional Salikos, other items or creatures your character interacts with should always be at last 50% visible

Good to know:

- Yes, you may draw all three prompts in one picture but they have to be clearly distinguishable - no shared backgrounds (you can use panels e.g.)
 - You can put as many Saliko in one picture as you want but the achievement will only count for max 3 of them
 - You can mix subspecies
 - Saliko with inbreeding disabilities cannot claim this permission.
 - You can't use the same entries for different trainings, permissions or rolls (f.e. breeding permission prompts)
-

2. Once you've finished the prompts

Please fill out the following form and reply [here](#)

Saliko Import: "Link"

Prompt 1: "Link"

Prompt 2: "Link"

Prompt 3: "Link"

Please note: You have to add links to all featured characters in the description of your piece!

3. An Admin will update your Import and add the “Basic Exploring Training” - Trophy to your comment chain on your Salikos Import

And you'll gain the corresponding Skill:

Power of Proficiency (more details in badge description)
