## Work Experience

### **Enterprise Attendance Tracking Web Panel for Bluefox.io**

Summer 2018

Freelance Developer

- Created a website which helped track employee's attendance throughout the day using Bluefox.io's mobile tracking technology.
- The website featured exporting to Excel sheets, managing a SQLite database through a simple interface.
- The backend was written in Nodejs with Express, frontend in jQuery and Bootstrap.

## Other Experience

### **Winner of Multiple Prizes at Hackathons**

2015 - Present

Team Leader and Developer

- Winner of multiple prizes including First prize, Best Use of Amazon Web Services, Best Use of Hedera Cryptocurrency, Best IBM "Call for Code" Project and more.
- Hackathons are 24-hour programming competitions in which a team of up to four people create a working project from scratch and provide a solution to help the world in some way.
- Created projects such as mobile app to incite cleaning up the environment, Messenger chatbot with cloud based mapping for disaster response.

### **Garlicoin Cryptocurrency Guide and Support Website "Garlic Recipes"**

2018

Lead Web Developer

- Created the official support website with guides to help people get started with Garlicoin.
- Garlicoin is a cryptocurrency originally created as a joke but which evolved into a project with more than 200,000 users which aimed to introduce people to cryptocurrencies.
- The website can be found at [guide.garli.co.in](http://guide.garli.co.in).

### **Enterprise Leadership Conference by Rotary Club**

2018

Leader and CEO of Team

- Learned about leadership, company management, financials, marketing, etc. in a competition to create a complete startup in 3 days.
