

Privacy Policy for Short Link Pro

Last updated: December 30, 2025

Short Link Pro ("we", "us", or "our") operates the Short Link Pro browser extension.

1. Information Collection and Use

We do not collect, store, or transmit any personally identifiable information (PII) to our servers.

- User Settings & History: All link history, UTM presets, and settings (such as dark mode preferences) are stored locally on your device using the Chrome Storage API (`chrome.storage.local`). This data never leaves your browser unless you explicitly choose to export it.
- URL Shortening: When you shorten a link, the URL is sent to the is.gd API (a third-party service) solely for the purpose of generating a shortened link. Please refer to is.gd's privacy policy for their data handling practices.

2. Permissions

- ActiveTab: Used only to retrieve the URL of the current tab when you choose to shorten it via the extension popup or context menu.
- ContextMenus: Used to add the "Shorten link" option to your right-click menu.

3. Third-Party Services

We use the is.gd API for URL shortening functionality.

4. Contact

If you have any questions about this Privacy Policy, please contact us via the Chrome Web Store support tab.
