

To get the moonshot collective started early, I bootstrapped the budget and paid people out of my own wallet.

We tracked all of these transactions here: [📄 Moonshot Budgets / Tx Tracking](#)

TL;DR

TOTALS:	9.635	ETH
	3758	GTC

At the current market price, that would be a total of: [7147.70862 GTC](#)

RECALC: $3758 \text{ GTC} + 4110 = 7868 \text{ GTC}$
