Abstracts

The abstract is written in one page with no more than 250 words (use word count in a computer program) in American English Style. (Time New Roman 11 points)

Divided into:

- Introduction
- Methods
- Results
- Conclusions, and
- Keywords (max 5 words/phrases)

Should not include

- Citations
- Statistics
- Abbreviations, if possible

Keywords: *first keyword, second keyword, third keyword, fourth keyword, fifth keyword*

Introductions

State the objectives of the article, the reasons for the study, the formulation of the problem, and the statement of purpose. Describe using a narrative format and without sub-chapter.

Methods

Reviews

should be recognized as scholarly by specialists in the field being covered, but should also be written with a view to informing readers who are not specialized in that particular field, and should therefore be presented using simple prose. Please avoid excessive jargon and technical detail. Reviews should capture the broad developments and implications of recent work. The opening paragraph should make clear the general thrust of the review and provide a clear sense of why the review is now particularly appropriate. The concluding paragraph should provide the reader with an idea of how the field may develop or future problems to overcome, but should not summarize the article. To ensure that a review is likely to be accessible to as many readers as possible, it may be useful to ask a colleague from another discipline to read the review before submitting it. (Times New Roman font 12).

Additional information in the article can be submitted in the form of figures and tables. Writing a table using the format of the border, font 11 and spaces 1. Submission of the table must be mentioned in the body text paragraph. Examples of writing tables can be seen in Table 1.

Table 1. Patient criteria in the schizophrenia and non-schizophrenic groups [2]

Characteristics	Schizophrenia (n=70)		Non schizophrenia (n=233)		Total (N=303)	X^2	p value
	n	%	n	%			
Gender							
Man	38	54,29	117	52,47	155	0.07	0.79
Women	32	45,71	106	47,53	138		
Age							
<55 years	48	68,57	151	67,71	199	0.89	0.18
≥55 years	22	31,43	72	32,29	94		

Information can also be presented in the form of figure (documentation, graphics, etc.). The submitted figure must be clear, the source is listed and eliminates subjectivity (for example, people's name). Submission of the image must be mentioned in the body text of the previous paragraph. Submission of information in the form of images can be seen in figure 1.

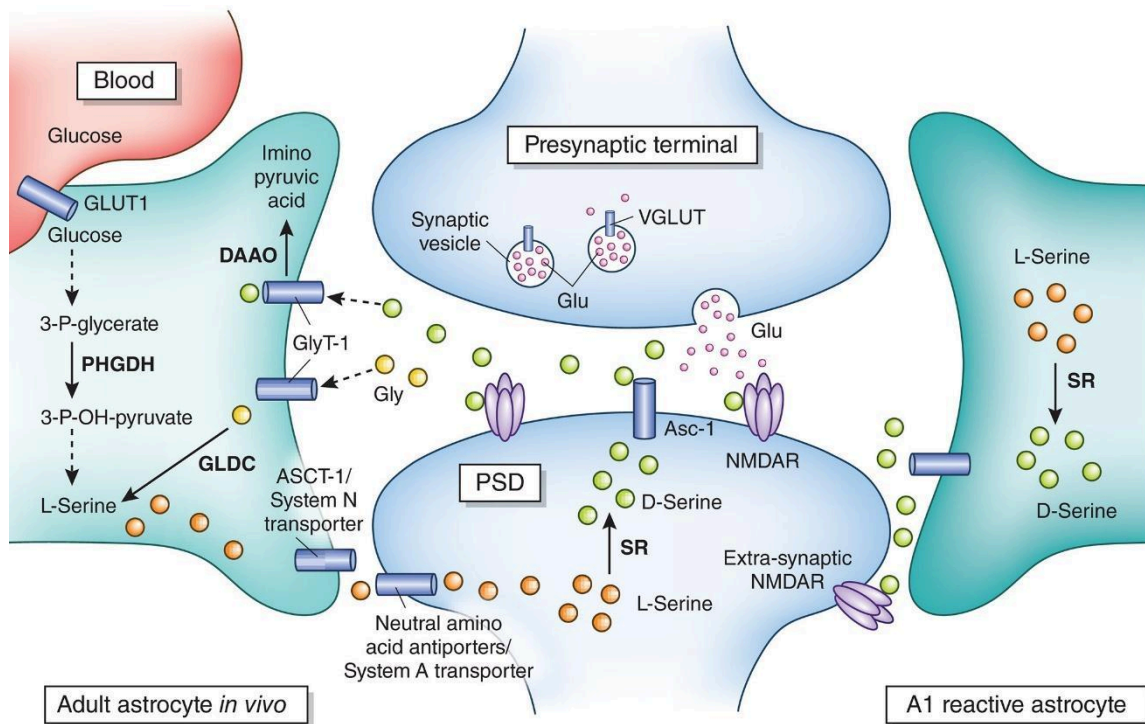

Figure 1. The Example of Figure [1]

Conclusions
This part should explain the main summary of the article, highlighting its importance and relevance as well as suggestion or recommendation for further research (citation-free). **(**Times New Roman font 12)

Acknowledgments
Mention the acknowledgment statement to the institution or person which has a contribution to your article.

Conflict of Interests

State the conflict of interest (if any).

Fundings

State if there is any funding for your article.

References

Minimum references are 20 items (minimum 3 textbooks). Preferably use references from scientific articles (with issues **not exceeding the last 5 years**) and textbooks **maximum published in the last 10 years**. The author can use special applications for bibliography such as: Mendeley®, **Zetero, EndNote, etc.**
