

Subject: How to Sell Your God Tier Ads Framework Better?

Hey [Name]

I recently found your God Tier Ads Framework.

I don't know much about marketing with Google ads but it seems like your course has a lot of value.

One thing I noticed though, you don't seem to have an informative course description.

Think about how many people see the value in your course but don't trust it due to a lack of information.

People need to be motivated and have a reason to buy.

They need to see something different from what they usually see.

Otherwise, they will just scroll through like any other course and try to find the next best thing.

I have written a course description that you can try out below.

It makes the reader curious and gives them a reason to go over the edge.

Let me know what you think.
