Transformational Leadership is a two-day experience designed to reinvent and empower your personal leadership and ministry teams. It focuses on one central question - what does it mean to BE a leader?

Most people learn a set of strategies and tactics but are frustrated when the situations and people don't line up to accommodate their knowledge base. We engage how you are thinking about yourself and others to open new possibilities for conversation and action. This training is designed to allow you to discover the automatic assumptions that influence your decision-making power through real-time, hands-on activities, facilitated by professional transformational trainers.

It is one thing to know what to do as a leader in the church. It is quite another to know who to be. We discuss the skills - what to do - but we set them in the

context of who you need to be so that as circumstances change, you can calibrate reality in order to achieve optimum results.
