AI KDP Accelerator tackles the actual bottleneck: listing optimization, catalog expansion, and doing Amazon's disclosure/review rules right instead of guessing.

Subject: Finally, a KDP guide for people who already published (not beginners)

Most "make money with KDP" content assumes you haven't started. If you've already got books live and they're just not selling, that's a different problem — usually keywords, categories, or a listing that doesn't convert.

AI KDP Accelerator is built specifically for that stage: 100 prompts to expand your catalog, a series/box-set strategy for higher revenue per buyer, a real publishing system, and Amazon-compliant keyword/review strategy.
