

Section 3: Start Small Step 1: Design & Run a Pilot

Activity: Visualize and Build a Prototype

[Link to activity and step-by-step instructions](#)

If You Created Multiple Prototypes...

Discussion Question	Notes
What parts of each prototype did we like?	
Was there one prototype that was a clear winner? How could we combine the best parts of each prototype into a new version?	
How well does the prototype align to our definition of success?	
Where can we make final improvements or updates?	

If You Created One Prototype...

Discussion Question	Notes
How well does the prototype align to our definition of success?	
How well does the prototype align with our original problem statement?	
Where can we make final improvements or updates?
