

**Subject:** Demand Immediate Action: Speak Out Against Trump's Brazen Corruption and Presidential Grifting

Dear [Senator/Representative] [Last Name],

As your constituent, I am writing to express my deep outrage and alarm at President Trump's ongoing and unprecedented corruption—corruption that is not only blatant, but corrosive to the very foundations of our democracy.

It is now undeniable that President Trump is using the office of the presidency as a personal cash machine for himself and his family. The most egregious example is his deep involvement in cryptocurrency “meme coins,” from which he and his family have already made billions of dollars in profits just days before his second inauguration. Ethics experts warn that this is perhaps the single largest conflict of interest in U.S. presidential history, with Trump poised to benefit personally from the very industry he is now overseeing and regulating as president.

The scale of this grift is staggering. Trump's family crypto ventures have already generated over \$100 million, and his administration is now encouraging a bidding war for “presidential access.” New filings reveal that cryptocurrency companies donated \$13 million to Trump's inauguration, only to see federal lawsuits and investigations into their activities abruptly dropped once he took office. Even the Department of Justice's cryptocurrency crime enforcement unit was disbanded, further removing any meaningful oversight.

These actions are not just unethical—they are a threat to national security, a betrayal of the public trust, and a green light for foreign and domestic special interests to buy their way into the White House. This is not the America we deserve.

I demand that you speak out—loudly, unequivocally, and immediately—against this corruption. History will remember those who stood by in silence, just as it will remember those who had the courage to defend the integrity of our democracy.

The American people are watching. We expect you to act.

Sincerely,

[Your Name]
