

Group 4: Velo Park - Questions

Questions for Speakers 10th July

Reflections:

- Presentations seemed pointless - answers were just waffling political jargon
- Group did not understand a lot of the information they were given
- Officer didn't speak and counsellor was just slumped in his chair like he didn't care
- They should find ways to give simple answers to simple questions
- Still trying to process the information given
- Didn't actually cover anything the assembly is about
- Took too long to answer the questions so didn't have enough time

Cllr James Asser

1. Do we have an input or are solutions already in place (as it seemed from the presentation)?
2. Why are the roads closed and pushing all the traffic onto Stratford causing the cars, vans and buses to create traffic jams and causing more idling polluting the air?
3. There doesn't seem to be any focus on older areas which are being forgotten, how will you prioritise areas where people currently live where there's a lack of green space?
4. Who has determined priority areas?
5. Why are Newham services not dealing with waste the way that they should? (recycling bins not being emptied)

Beau Stanford Francis

- 1.

Our 2 most important questions are:

Do we have a meaningful input or are solutions already in place (as it seemed from the presentation)?
