**\*\*\* VisitorsTracker - Secret Analytics W/Mouse Heatmaps & Full Visitor Recording \*\*\***

*(Whitelabel Worth \$369)*

With classic analytics software you can find out that user X went from page A to page B and then left. Have you ever wondered what users actually do on your pages?

How they move the cursor (note that in 80% of the time the user's eyes follow the cursor), when they click a button, how they interact with your JavaScript widgets, what part of your website draws the most attention, etc.. VisitorsTracker does exactly that!

Features;

- => Record visitors on your site: Watch replays of their visits
- => HeatMaps and visitors statistics included
- => Well optimized: tracking does not affect site performance
- => HTTPS and Mobile Support
- => Multi-domain: track multiple domains on a single server
- => Auto-installer: quick step-by-step installation wizard

### **(1) Social Media Viral Content Builder for Wordpress**

Ultimate plugin for making content viral.

Get ready to rocket your content into the viral stratosphere. This automated plugin developed for Wordpress can hide any content so that in order to read it the user must share it via social media channels. This has the potential to bring much more traffic to your content and turn it viral.

What does it do?

With our plugin you can stop visitors from reading a part, parts or an entire article before sharing it via facebook, twitter or Google +. This means you can hide a chart that shows.. iii. the key elements of your post, a paragraph with the answer to all there problems, images, file downloads, any individual piece of text can be hidden until the visitor shares your article with their friends.

Imagine offering a free pdf with the top 10 marketing success tips and having visitors share the article before being able to download it. How about a cooking recipe that users need to share before getting the complete ingredients. Mondays Workout to lose 10 pounds a week? BOOM hidden. There are endless ways that this plugin can be used to compel visitors to share the article socially. This plugin has helped clients increase shares by as much as 1,000% in a few days and helped increase readers/visitors.

Additionally you can use this plugin with our other products to create a 360 Degree Automated marketing process for your websites success.

Our Viral Content Builder plugin for turning your content into viral building powerhouses by blocking certain pieces of your content so that visitors must share it to gain access to important images, text, charts, videos, etc.

And our Twitter Manager to automate the process of getting you followers using targeted Hashtags, Keywords or even sniping followers from your competitors.

## (2) Sharelock: Unlock Content with Visitor Number

In the world of internet marketing, there is one thing that everyone needs to become successful and that is traffic. Without traffic, you will not gain subscribers to your mailing list, make sales for your products, get adsense clicks or anything else you wish to achieve from your website. Without traffic, you have no business and certainly no income coming in. And there's where Sharelock comes in to help you.

As you may already know, viral marketing relies heavily on word of mouth marketing. There is no limit on the amount of traffic you will get as you wouldn't have known how many people are spreading the message for you. Most people are curious, if they receive the message from somebody they know or trust, they are most likely eager to find out what's the "buzz" behind. One of the most common technique to go viral is giving something for free. But why not giving something premium for free but with an extra challenge. In fact people loves challenge.

With Sharelock, you can easily lock and hide partial or all of your content. And the best part is that it can only be unlocked with enough visitors. Sharelock will let user unlock and unhide partial or all of your content by driving traffic to your post/page.

### (3) Viralist - Viral lists script with Facebook App

Viralist is a Viral lists website script written in PHP that lets you build a viral content website with awesome curated lists like BuzzFeed. Viralist supports a lot of media types like Photos, videos(Youtube and Vimeo), SoundCloud audio, quotes, etc.

## **(5) LinkedIn Viral Social App**

This viral social app can let you users connect with their LinkedIn account before being able to access a reserved content (video, article, download, ...).

Features;

Easy to install

Easy to use

Quality code

This viral social app is equipped with the dedicated administrative module

Be able to post a message on your users LinkedIn wall

Automatic autopost on your users LinkedIn wall when they first connect

## (6) Quizmaster - Viral Quiz Maker for WordPress

Quizmaster lets you create clean and beautiful viral quizzes to drive traffic to your WordPress website through sharing and social networks. The plugin provides comfortable and easy to use quiz creation tools in the admin panel.

Quizzes are very popular lately, they help to promote your website, raise your users' engagement, and attract new visitors.

**All Features;**

- Create basic and personality quizzes
- Embed quizzes into any post or page using a shortcode
- Create multiple choice questions
- Add as many choices per question as you like
- Beautiful design and smooth transition between questions
- Works with any theme. If you're facing an issue using the plugin, please contact me and I'll help to resolve it.
- Collect participants' information (first name, last name, email, or a combination of these) before questions or before results
- Responsive, works nicely in iOS and Android
- Export quiz results in the CSV format
- Export and import quizzes

**7.) WP Artificial Intelligence Assistant (Worth \$127)**

This unique Wordpress plugin adds a virtual smart assistant on your website and allows you to easily program his A.I from a powerful visual system. An assistant can be created to intelligently sell products, advise and inform your customers, guide them on the website etc ...

It can show elements of the website, redirect to specific pages, send the discussion to admin by email, send all the interactions to a specific php page (useful to fill a form with the user's answers).
