I.WORKSHOP: professional presentation 20 minutes

Title:

Students as Constellations; Helping Dyslexic & Dyscalculic Learners Shine with Evidence-Based Approaches.

Abstract:

By thinking about students as a celestial constellations--a unique configuration of strengths, challenges and traits, aligned with the best practice methodology, all the stars of the constellation can shine brightly. Learn about and practice evidence-based methods employed at the Odyssey School in Maryland, USA that help students struggling with reading, writing and mathematics shine to their full academic potential.

Target Audience:

This workshop is aimed for educators of students with dyslexic & dyscalculic learning profiles.

Conclusions:

Participants will learn about shared cognitive constructs problematic for students with dyslexic & dyscalculic learning profiles, along with evidence-based methods that support students' constellation of academic challenges and strengths. Content from the workshop is rooted in the latest neuroscientific research and will infuse activity and discussion with practical lesson takeaways for teachers based in Europe and beyond.
