## AUD-5

"If the enemies of the Foundation use the  
anomalous, then the only way to defeat them is the  
anomalous."

---

Section 1 - Intro

Section 2 - Duties

Section 3 - Guidelines & Promotions

Section 4 - Ethics

## Introduction

---

The research division known as AUD-5 is the first of  
its kind within Site-56's research department. Never  
before has a division dedicated to using the very  
objects we contain to our benefit existed. But now,  
AUD-10 arises.

---

## Duties & Expectations

-----  
As a member of AUD-5, you will be working with incredibly sensitive info that will involve the study and utilization of anomalies. This is dangerous information, and it could be catastrophic if obtained by outside parties. As a result it is required you follow these expectations.

- Develop ideas for weapons/enhancements.
- Limit the spread of findings & creations within the division to other parties.
- Run tests and write documents related to our division of high quality on a regular basis.

## Rules

-

1. You still are a researcher.
  - And as a researcher you are still required to follow CoE and CoC and Legal Codex, just because you develop weapons does not mean you can use them outside of normal bounds (excluding during events if authorized)

-

2. Chain of Command

- Respect the global chain of command unless doing so endangers your life, the life of other Foundation personnel, or it breaks the Code of Ethics

---

## **Guidelines & Promotions**

### **AUD-5 Chain of Command**

Division Lead  
Enhancements/Weapons Lead  
Enhancements/Weapons Assistant Lead  
Senior Enhancements/Weapons Developer  
Enhancements/Weapons Developer  
Junior Enhancements/Weapons Developer

In the event two conflicting orders are received from the same rank, i.e Enhancements and Weapons lead give conflicting orders to a junior, then the junior should listen to their respective division.

### **Project Limits**

You may only participate in the creation of 2 AUD-5 projects at a time. You may only participate in the projects respective to your division. (i.e Weapons Dev. cannot work on a bionic leg.) All projects must be approved by Assistant Lead+

---

## **Ethical Limits**

With our unique position we have unique standards and one of those standards is ACWE or Always Check With Ethics. Not sure if you can replace a D-Class' arm without their permission? ACWE! Not sure if an anomaly is cleared for use? ACWE! Not sure if you can perform advanced prosthetic replacement surgery? Dont. Point being if you enjoy your job here in the foundation make sure all your boxes are checked.

---

## **Project Approval**

For project approval, talk to your Division Lead (i.e weapons lead) and if one is not present, you may talk to the Division Lead to get the project approved. Projects involve things like developing weapons and enhancements. Try to make each one unique, and have a special use for MTF members.

---

## **Divisions**

---

The sub-divisions within AUD-5 are:

Enhancements - Enhance the body using rituals,  
cybernetics, other anomalies

Weapons - Create anomalous weapons
