24 Hour Appliance Repair Near Me in West Hollywood, CA

After a decade of fixing appliances all over West Hollywood, I've seen it all. Here's what most people get wrong: thinking a big brand name means better repair service. Honestly, sometimes the name on the van charges you more just because they can. Everyday Appliance Repair is right here on Lexington Ave — and we keep it straightforward and fair.

Down here in West Hollywood, having an appliance go on the fritz at midnight is more common than you'd think. At Everyday Appliance Repair, we've handled over 1,500 jobs — everything from busted fridges to dead dryers — especially around Plummer Park and Melrose Avenue. A lot of "24 hour" services stop answering the phone after 9 p.m. We don't. Call us at any hour and you'll get a live person at (323) 364-0193, or check our site at appliancerepairserviceglendale.com/west-hollywood.

Every job starts with a free estimate before we touch anything. No surprises when the bill arrives. We know these neighborhoods — from Beverly Center to the Fairfax District — and that local knowledge matters more than most people realize.

What Most People Get Wrong About 24 Hour Appliance Repair Near Me

In our experience, the biggest misconception is that "24 hour appliance repair" means we show up, wave a wrench around for 20 minutes, and everything's fixed. Sometimes that's true. Often it's not — and I'd rather tell you that upfront than take your money and disappear.

Here's a specific example. We had a call at 1:30 a.m. from a homeowner near the Sunset Strip with a Sub-Zero Model 648 that had stopped cooling. The customer expected us in and out in

an hour. The actual problem was a failed evaporator fan motor — a part we don't stock on the van for that model because Sub-Zero uses proprietary components. We ran diagnostics, confirmed the issue, sourced the part by 8 a.m., and had the fridge running by noon. Total time: about 10 hours from first call to fix. That's a good outcome for a Sub-Zero — but it's not the 60-minute miracle some companies promise at midnight.

Working on a Sub-Zero is nothing like working on a Whirlpool WRF535SWHZ. Different diagnostic tools, different part channels, different labor time. We've installed over 200 compressor assemblies across both brands, and the gap in complexity is real.

Brand Common Issues Same-Night Fix Possible? Parts Availability Typical Timeline			
--- --- --- ---			
Whirlpool	Leaky hoses, door seals	Yes, most cases	High — we carry common parts on the van 1–2 hours
Sub-Zero	Cooling failure, evaporator fan	Rarely	Moderate — proprietary parts often special-order 10–24 hours
Bosch	Dishwasher not draining, control board	Sometimes	High Same day, usually 2–3 hours
Thermador	Oven igniter, burner valve	Sometimes	Moderate 2–4 hours, parts dependent
LG	Compressor failure (known issue), ice maker	Yes for ice maker	High 1–3 hours

According to Everyday Appliance Repair, the brands that cause the most after-hours confusion are Sub-Zero and Miele — not because they're bad appliances, but because their parts aren't sitting on a shelf at the local supplier at 2 a.m.

One pro move: if your appliance throws an error code before it dies, photograph it. That single step can cut our diagnostic time by 30–45 minutes and sometimes tells us exactly which part to bring on the first visit.

How Much Does Appliance Repair Cost in West Hollywood?

Based on over 1,500 jobs across West Hollywood neighborhoods — from the older apartment buildings near Santa Monica Boulevard to the newer condos going up near Beverly Center — here's what repairs actually cost.

Emergency after-hours jobs carry a service call fee of \$75–\$100 on top of the repair cost. During regular hours, that fee drops to \$50 and is waived if you book the repair with us. Total costs for the most common jobs run like this:

Repair Type Cost Range Typical Time on Site Notes			
--- --- --- ---			
Washer Belt Replacement (Whirlpool, Maytag)	\$150–\$200	1–2 hours	Part usually on van

Refrigerator Compressor (Sub-Zero)	\$400–\$600	3–5 hours + parts lead time	Sub-Zero parts sourced from authorized distributor
Oven Igniter Replacement (Thermador, GE)	\$175–\$225	1–2 hours	Mostly labor; igniter itself runs \$40–\$80
Dishwasher Drain Pump (Bosch)	\$160–\$240	1.5–2 hours	Part commonly in stock
LG Refrigerator Ice Maker	\$150–\$220	1–2 hours	High failure rate on 2017–2020 LG French door models
Dryer Heating Element (Samsung, LG)	\$140–\$200	1–2 hours	One of our most common calls

High-end brands — Sub-Zero, Viking, Miele, Thermador — typically land in the upper third of those ranges due to part cost and diagnostic complexity. Standard brands like Whirlpool, Maytag, and Kenmore usually come in at the lower end.

We give you a firm quote before starting. No hourly surprises.

What to Look for When Choosing Appliance Repair in West Hollywood

After 10 years working in West Hollywood homes — from the 1920s Spanish-style buildings near Plummer Park to the newer glass-and-steel units along La Cienega — I can tell you what actually separates a good repair shop from a forgettable one.

Certified technicians for the brands they claim to service. At [Everyday Appliance Repair](#), we carry factory certifications for Samsung, LG, and Whirlpool, and we've completed Bosch's authorized service training. Ask any company you're considering which brands they're actually certified on. Vague answers mean vague repairs.

Specific response windows, not promises. We typically arrive within 90 minutes for West Hollywood calls during off-peak hours, and within 2–3 hours during peak traffic times — anyone who's tried to cross Fairfax at 6 p.m. knows why that caveat matters. If a company can't give you a window tighter than "sometime today," that's a problem.

A real parts inventory. We stock the 40 most common failure parts for Whirlpool, Maytag, LG, and Samsung on every van — door gaskets, heating elements, drain pumps, belts, igniters. That's why most standard-brand repairs get done on the first visit.

Upfront pricing. West Hollywood's building stock includes a lot of older units with non-standard configurations. Homes near Plummer Park sometimes have older 120V dryer setups or undersized breaker panels that complicate repairs. A good tech spots that in the first five minutes and adjusts the quote before starting — not after.

West Hollywood also operates under City of West Hollywood building codes, which differ from unincorporated LA County rules in specific ways — particularly around gas line work and permitted appliance replacements in multi-unit buildings. We know those codes. If your landlord or HOA requires a permit for a gas range swap, we'll tell you before you find out from an inspector.

How to Find Appliance Repair Near Me in West Hollywood

Everyday Appliance Repair is located at 7533 Lexington Ave #203, West Hollywood — about a 10-minute drive from The Grove without traffic, and walkable from the Melrose and Fairfax intersection. We serve all of West Hollywood, plus Hollywood, Beverly Hills, Los Feliz, Silver Lake, Fairfax, Mid-Wilshire, Hancock Park, Koreatown, Culver City, Santa Monica, Studio City, Sherman Oaks, Burbank, and Glendale.

Find us directly on Google Maps — our hours and availability stay current there.

What Makes Appliance Repair in West Hollywood Different

In our experience serving this area for over a decade, West Hollywood throws a few specific curveballs that other LA neighborhoods don't.

The housing stock is genuinely mixed. We work on 1930s courtyard apartments near Formosa Avenue with original wiring, and then drive six blocks to a 2022 condo build near the Sunset Strip with smart appliances and Wi-Fi-connected ranges. The diagnostic approach for each is completely different. An older building on Havenhurst Drive might have aluminum wiring that affects how a dishwasher's control board fails — that's not something a tech without local experience would think to check first.

West Hollywood's climate puts steady pressure on refrigeration. Unlike inland areas that swing between cold winters and hot summers, WeHo stays mild but consistently warm — which means refrigerators and wine coolers run almost continuously year-round. In our experience, compressors in this zip code show wear about 18 months earlier than the same models in, say, Pasadena. Annual coil cleaning genuinely extends fridge life here by 2–3 years.

HOA and building management rules are stricter here than in most of LA County. Multi-unit buildings along Santa Monica Boulevard frequently require written notice to management before any appliance replacement — even a dishwasher swap. We've helped enough West Hollywood residents navigate that process to know which buildings require it and which don't.

The honest advice I give every customer: before you replace an appliance, let us run a 30-minute diagnostic. Nine times out of ten, what looks like a dead machine has one failed component. We've saved customers \$800–\$2,000 on replacements they didn't need by catching a \$40 part first.

Call us at (323) 364-0193 or visit appliancerepairserviceglendale.com/west-hollywood.

Pro tip from Everyday Appliance Repair: California heatwaves push appliances hardest between July and September. If your fridge or AC unit is already struggling in June, don't wait — parts and scheduling get backed up fast once temperatures hit 95°F and half the city's equipment decides to quit at the same time.

FAQ

What appliance brands does Everyday Appliance Repair service in West Hollywood?

We've handled everything from entry-level Kenmore and Hotpoint units to high-end Sub-Zero, Viking, and Thermador models. Our most common daily work is on Whirlpool, Maytag, LG, Samsung, and Bosch — brands we stock parts for on every van. We also service European brands like Miele and AEG, though those occasionally require a parts order depending on the model year.

How much does appliance repair cost in West Hollywood?

Budget \$150–\$400 for most standard repairs. High-end brands — Sub-Zero, Thermador, Viking — typically run \$350–\$600 depending on the part involved. At Everyday Appliance Repair, we give you a firm quote before starting anything, so the number you hear upfront is the number on your invoice.

Do you offer same-day appliance repair in West Hollywood?

Yes — for most standard brands. After 10 years serving West Hollywood, we've built our parts inventory around the most common failures we see here. Same-day completion runs about 85% for Whirlpool, LG, Samsung, and Bosch calls. Sub-Zero and Miele are the exceptions; those sometimes require a next-day parts run. Call (323) 364-0193 and we'll tell you immediately whether your repair is same-day likely or not.

Is it worth repairing an old appliance or should I replace it?

Our rule of thumb: if the repair costs less than 50% of a comparable new unit and the appliance is under 10 years old, repair it. Over 10 years, it depends on the brand. A Viking range at 15 years with one bad igniter is absolutely worth fixing — that unit has another decade in it with

proper maintenance. A 12-year-old entry-level Frigidaire with a failed compressor is a closer call. We'll give you an honest read either way.

Ready to Book a Repair?

Got an appliance giving you trouble? Call (323) 364-0193 for a free estimate from Everyday Appliance Repair — we handle everything from everyday Whirlpool repairs to high-end Thermador and Sub-Zero diagnostics. We're at 7533 Lexington Ave #203, and we've been serving West Hollywood — including Plummer Park, Melrose Avenue, the Sunset Strip, and the Fairfax District — for over 10 years.

Weekend slots fill up fast, especially during summer. Book your repair this week by calling or visiting appliancerepairserviceglendale.com/west-hollywood. You can also find us on Google Maps.

We also serve Hollywood, Beverly Hills, Los Feliz, Silver Lake, Fairfax, Mid-Wilshire, Hancock Park, Koreatown, Culver City, Santa Monica, Burbank, Glendale, Studio City, and Sherman Oaks.
