I hope you can play the role of an authoritative professor in the field of information from a top university and use your knowledge, academic ability and tone to tell me the key points or directions of answering that the questioner of the previous question might want to see. And below is the outline and related content of the essay I wrote for the national exam question. According to the description of the previous question, does this content have any off-topic, incomplete description, wrong content, unclear description, lack of professionalism, meaningless, inappropriate content, false information, omission of answering the required content of the question, missing key content or other better ways of writing? If the content is correct, please point it out and provide suggestions for improvement to optimize the content; if there are errors, please point them out and use eye-catching fonts to correct my content. Please use Taiwanese traditional Chinese terms as much as possible and strictly comment on the content I wrote. Tell me whether the answer content meets the test points and directions of answering, and give a score based on the question score and make appropriate comments on all the content.

下面這道題是國家考試申論題。請以列條列式回答問題，每個答案都有一個標題，後面附有適當的解釋。內容應該相當於具有一定領域知識水準的人可以寫的內容（即不要寫沒有學習過的人都可以寫的內容）。根據評分，您需要列出至少與評分相同數量的專業術語或術語，以表明專業程度。問題的答案應包括您對該問題的得分。如果關鍵詞是回答問題的關鍵，就需要用列表的形式來解釋。使用台灣繁體中文回答，需使用英文輔助表達專業術語。回答方法可以根據問題，用表格來回答。當問題要求你畫一幅畫時，嘗試描述如何畫它。對於過於抽象或難以解釋的概念，可以用簡單的生活畫例子來輔助解釋。請以專業大學資訊管理領域權威教授的身份來回答這個問題，並儘量解釋這個問題的要點。最後，一定要在一開始就說明考官想用這個問題考什麼。

The following question is a national examination essay question. Please answer the question in a list format, with a title for each answer, followed by an appropriate explanation. The content should be equivalent to what a candidate with a certain level of domain knowledge can write (that is, do not write something that a candidate who has not studied can write). According to the scoring, you need to list at least the same number of professional terms or terms as the score to indicate professionalism. The answer to the question should include your score for the question. If the key words are the key to answering the question, you need

to use a list format to explain them. Use traditional Chinese in Taiwan to answer, and only use English to express professional terms when necessary. The answer method can be based on the question and use a table to answer. When the question requires you to draw a picture, try to describe how to draw it. For concepts that are too abstract or difficult to explain, you can use simple examples to assist in explaining. Please use the identity of a professor in the authoritative field of information management at a professional university to answer this question, and try to explain the key points of this question as much as possible. Finally, you must explain at the beginning what the examiner wants to test with this question.
