Keywords

Type your abstract here (10 pt).

The abstract has to be written within 250 words maximum and followed by with three to five keywords.

1. Introduction (bold, 12 pt)

The introduction must contain (sortly and consecutively) a general background and a literature review (state of the art) as the basic of the brand new research question, statements of the brand new scientific article, main research problems, and the hypothesis. In the final part of the introduction, the purpose of the article writing should be stated. In the scientific article format, it does not allow to write down the references as in the research report. They should be represented in the literature review to show the brand new of the scientific article. (11 pt)

2. Literature Review (bold, 12 pt)

Literature review articles contain an analysis and commentary of the publications on a specific area of research (latest trends 10 years). In larger subject areas, the review may point to significant works in that topic. However, new and emergent areas might have a small enough body of knowledge to be covered in its entirety. The purpose of the literature review article is to describe the general state or condition of the topic under consideration and to analyze and critique the latest trends and developments in that topic.

3. Research Method (bold, 12 pt)

Contains the research design used (methods, types of data, data sources, data collection techniques, data analysis techniques, measurement of variables) written in the form of flowing paragraphs (not numbered). (11 pt)

$$\ln Y_t = \alpha_0 + \alpha_1 \ln X_{1t} + \alpha_2 \ln X_{2t} + \alpha_3 \ln X_{3t} + \alpha_4 \ln X_{4t} + \alpha_5 \ln X_{5t} + \alpha_6 \ln X_{6t} + \mu_t \dots (3.1)$$

4. Results and Discussion (bold, 12 pt)

Contains the results of empirical research or theoretical studies that are written in a systematic, critical analysis, and informative. The use of tables, figures etc. is only as a support to clarify the discussion and is limited to supporters who are truly substantial, for example tables of statistical test results, images of test results of models etc. Discussion of the results is argumentative concerning the relevance of the results, theories, previous research and empirical facts found, and shows the novelty of the findings. (11 pt)

Table 1.

XXXXX	XX	XX
XXXXXXXXXXXXX	XXXXX	XXX
XXXXXXXXXXXXX	XXXXXXXXX	XXX

We suggest that you use a text box to insert a graphic (which is ideally a 300 dpi resolution TIFF or EPS file with all fonts embedded) because this method is somewhat more stable than directly inserting a picture. To have non-visible rules on your frame, use the MSWord "Format" pull-down menu, select Text Box > Colors and Lines to choose No Fill and No Line.

Figure 1.

Source :

$$\ln Y_t = \alpha_0 + \alpha_1 \ln X1_t + \alpha_2 \ln X2_t + \alpha_3 \ln X3_t + \alpha_4 \ln X4_t + \alpha_5 \ln X5_t + \alpha_6 \ln X6_t + \mu_t \dots (4.1)$$

5. Conclusion

Contains conclusions with extensive deprivation of the discussion of research results that are written briefly and clearly, showing clarity of the contribution of findings, sparking new theories and the possibility of developing research that can be done in the future. Theoretical and practical implications written in flowing paragraphs.

References

The references used are listed in the alphabetical order of the author's name with the sample format (books and journals) as is common in the bibliography. The bibliography used last 10 years with 50% of journals, and must include minimum one reference from an article that has been published in Journal of Islamic Economics and Finance Studies. The references should use a reference application management such as Mendeley, End Note, or Zotero. The writing format that used in Journal of Islamic Economics and Finance Studies follows the format applied by APA 6 th Edition (American Psychological Association).
