

# South Denver Drupal Meetup

*April 8, 2013*

## Triage (help!)

OG in 7: how to put a group-specific block on the group page, in addition to the group content. Use group node id as the value for a contextual filter.

Taxonomy Menu Block module ... organizing menus per taxonomy structures.

## Annoyances

Media\_dev profile: throws errors about not being able to find the profile. File permissions not a problem; file is there.

## Tips/Tricks

### SEO:

SEO Checklist module --

Schema.org --

Metatags module, not so much for meta tags, as for social media connections. E.g., books site, metatags for each book. Can control what data goes out to social media sites.

Screaming Frog: [screamingfrog.co.uk](http://screamingfrog.co.uk) -- local spider.

SEO Compliance Checker, SEO Tools modules

Public meetings: event tied to an agenda.

One recipe: a meeting content type with appropriate fields. An agenda content type with appropriate fields. Use Entity Reference module to add a field to the meeting content type, to link to agenda nodes.

Node access user reference -- finer grained node access.

Features -- Strongarm, to add variables to features.

Honeypot module for spam prevention: similar to Botcha.

How to get server variable in Javascript: `drupal_attach_settings()` to put variables to the settings field, part of Drupal behaviors -- use Javascript as part of `drupal_attach_behaviors` block.

## Next Month:

Discussion of workflows?
