Abstract - The abstract is written in English which contains the main issues, objectives, methods and implications. Abstracts are written in one alenia, no more than 250 words.

Keywords: keywords1; keywords2; keywords3; keywords4; keywords5.

1. INTRODUCTION

The introduction includes background on the issue or problem, urgency and rationalization of research and service activities (Mulyawan et al., 2025). The objectives of the activities and the problem-solving plan are presented in this section. A review of the relevant literature and analysis of situations specific to service are included in this section. The citation and citation model used in the paper is APA Style 7th edition (Supiyandi & Mailok, 2025).

Describe the general conditions that are the background of the service activity. Examples of content: technological developments, educational conditions, community economic conditions, public health, MSMEs, environment, village government.

The most important part of the service journal. Explain: who are the partners, Location, partner conditions, problems faced and causes of problems (Chairul Fajar Tafriyanto et al., 2023).

2. IMPLEMENTATION METHOD

The method explains the design of the activity, how to choose the respondents/target audience, the materials and tools used, the design of the tool and its performance and productivity, data collection techniques, and data analysis techniques.

Describe the stages of the activity systematically. Commonly used stages include: Preparation, Coordination, with partners, Preparation of materials, Implementation of training/counseling, Mentoring, Monitoring and Evaluation. And we recommend making a flowchart and giving the image title as well as a description of the flow after the image, example of figure 1 (note the layout of the image is *in line with text*):

Figure 1. Systematic flow of activity stages

This paragraph describes the flow from figure 1 in Describe the stages of the activity systematically. Commonly used stages include: Preparation, Coordination, with partners, Preparation of materials, Implementation of training/counseling, Mentoring, Monitoring and Evaluation.

Example explanation: Figure 1 shows the flow of community service activities that are carried out systematically. The activity began with preparation, followed by coordination with partners to agree on needs and activity plans. Furthermore, the preparation of material is carried out as training or counseling material. After that, the activity entered the training/counseling implementation stage, then followed by assistance to participants to ensure the application of the material.

The next stage is monitoring to monitor the progress of the implementation of activities, and ends with an evaluation to assess the achievement of the goals and effectiveness of the service program. (can use points 1, 2, and 3 or a, b and c, etc.)

2.1 Sub section (when there is)

Subsection is a part of a section (main chapter or subchapter) that is used to group discussions to make them more systematic and easy to understand.

In journal article writing, the subsection is usually under the main heading. 2.1 Locations and Partners (Subsection). Contains an explanation of the location of the activity and the characteristics of the partner. 2.2 Problem Identification (Subsection). Contains an explanation of the problems faced by the partner based on the results of observations or interviews. 2.3 Implementation Stages (Subsection).

2.2 Sub section (when there is)

Notice that every new paragraph after the SUB or SUB-SUB Title title is not a new alenia. Subsection is a part of a section (main chapter or subchapter) that is used to group discussions to make them more systematic and easy to understand. After this paragraph, there is a new alenia.

In journal article writing, the subsection is usually under the main heading. 2.1 Locations and Partners (Subsection). Contains an explanation of the location of the activity and the characteristics of the partner. 2.2 Problem Identification (Subsection). Contains an explanation of the problems faced by the partner based on the results of observations or interviews. 2.3 Implementation Stages (Subsection).

2.3 Sub section (when there is)

Notice that every new paragraph after the SUB or SUB-SUB Title title is not a new alenia. Subsection is a part of a section (main chapter or subchapter) that is used to group discussions to make them more systematic and easy to understand. After this paragraph, there is a new alenia.

In journal article writing, the subsection is usually under the main heading. 2.1 Locations and Partners (Subsection). Contains an explanation of the location of the activity and the characteristics of the partner. 2.2 Problem Identification (Subsection). Contains an explanation of the problems faced by the partner based on the results of observations or interviews. 2.3 Implementation Stages (Subsection).

Table captions are placed on top of the table. Table titles are written in the middle of space 1. Tables should not be images. An example can be seen in Table 1. If after the illustration continues with the writing of the next section, then the distance is 1 space.

Table 1. Example table caption

Variable	Table Subtitles	Value (Jt)
x	10	8.6
y	15	12.4
z	20	15.3

Numbering written in parentheses and right flat. Space 1 space with paragraphs before and after. Write equations in Times New Roman font or Symbol font.

If there are multiple similarities, number the equation. The numbers of the equation should be in order, placed on the far right, namely (1), (2), and so on. Use signs to make the equation more concise. Use italic fonts for variables.

$$\sum_{x=20}^{n=10} y = \left(\frac{n}{y} \right) \quad (1)$$

$$\sum_{x=20}^{n=10} y = \left(\frac{n}{y} \right) \quad (2)$$

The notation description of the mathematical equation written should be included at the end.

3. RESULT AND DISCUSSION

This section presents results with a clear description. Results can be supplemented with tables, graphs (images), and/or charts. The discussion section explains the results of data processing, interprets the findings logically, relates to relevant reference sources, and the implications of the findings.

This section will be stronger if it is supported by quantitative data (e.g. pre-test and post-test results, satisfaction percentage, or indicator achievement) as well as qualitative data (observation results, interviews, participant testimonials, and activity documentation). The combination of the two will show the effectiveness of the program more comprehensively and improve the quality of articles for community service journals.

And it can be made sub-sections: 3.1 Implementation of Activities, 3.2 Results of Activities, 3.3 Program Evaluation, 3.4 Discussion, 3.5 Impact and Sustainability of the Program. And also display photos of activities when doing, and/or can also display photos of socialized products

Figure 2. Pictures of IJASIO (sample)

4. CONCLUSION

The conclusion explains what to expect in the Introduction section, as well as the conclusion of the Results and Discussion section. Conclusions can also be added to future research development plans. Write only 1 paragraph. For community service journals, the conclusion generally consists of 1 paragraph with a length of about 250 words, written concisely, concisely, and directly reflects the achievements of the activity.

5. ACKNOWLEDGMENTS

Gratitude was conveyed to those who helped the implementation of the community service program.
