

# 50- Bai 50 Albert Einstein (Story)

50- Bai 50 Albert Einstein (Story).mp3

## Câu Chuyện

My name is Albert Einstein. Many people know about the great things I've **accomplished**. But I had many **barriers** before I became famous. I was born in Germany. When I was in **elementary** school, I already knew about math and **statistics**. When I was a boy, I **pretended** to be a great scientist.

I loved school, but my life at home was hard. My father lost his job, so my family lived in **poverty**. We could not pay the **rent** in Germany. We became **immigrants** and went to Italy. I finished high school and went to college in Switzerland.

After college, I began writing about science. I did not reach success in an **instant**, though. At first, other scientists did not **approve** of my work. They thought I was a **failure**. Rising to the **rank** of an admired scientist was a **gradual** process. Soon, people started to notice that I was right. At last, I began to get some **recognition**.

I showed how to find the **approximate** size of very big things, like stars. I also **detected** and explained the movement of very small things, like atoms. And for fun, I made a machine that could **refrigerate** food by **inserting** heat.

I never **retired**. It was my duty to keep working. I overcame many hard times, and I will be remembered for my important works.
