Dear Susan

RE: Active Transport priorities for the Blue Mountains

I am writing to you seeking support from the NSW Government for more active transport shared paths and cycleways in the Blue Mountains.

In particular, I seek your support for the priorities identified by Ride Blue Mountains in its recent presentation to the NSW Government including:

1. Linden and Faulconbridge connection – Great Western Hwy
2. Lapstone Hill Access to the Glenbrook Tunnel from the Nepean River and Knapsack viaduct
3. Sinclair Ave, Wentworth Falls (safe crossing to Leura)
4. Hawkesbury Road Safety Upgrades
5. A pedestrian/ cycling bridge or tunnel connecting Macquarie Road and Buttenshaw Park
6. Upper Mountains Cycleway connecting Katoomba and Mt Victoria
7. Connecting Blue Mountains Town Centres and Destinations with high quality active transport links.

I support these projects because they will:

- Improve road safety, improve community health the environment and the boost the local economy
- Encourage more families to walk and cycle in the Blue Mountains to shops, schools and other destinations and improve road safety for all road users
- Improve active transport links will provide residents and visitors the opportunity to leave the car and walk or cycle to destinations within 20 minutes of home or public transport connections.

I look forward to hearing how you will be working with the Federal Government and NSW counterparts to deliver these projects to ensure we get a quality active transport network in the Mountains.

Yours Sincerely
