

[Global warming leads to rise in red deer population](#) December 16, 2019 Scotland

Daily Pioneer

... A new study has said that Scotland's red deer are altering their birthing patterns in order to adapt to global warming. This finding has come in the light of the Scottish Government's order of culling of the red deer whose population has multiplied over the years. It is estimated that the main highland range in Scotland now has about 400,000 of the animals..,
