

Do Science - SciEvents FAQ

we'd like to introduce a new project of Do Science, SciEvents. SciEvents is a community-driven, shared calendar (+ newsletter) of scientific events in bioscience that organized in Warsaw.

Online calendar can be found also here

<http://doscience.iimcb.gov.pl/>

Fb event to get to v.0.99: <https://www.facebook.com/events/1680397155565319/>

For users

How to join the group (to get a list of events via e-mail every Friday)?

To subscribe to the group, send an empty email to do-science-scievents+subscribe@googlegroups.com

or view posts online <https://groups.google.com/forum/#!forum/do-science-scievents>

You can unsubscribe any time you want! To unsubscribe from this group and stop receiving emails from it, send an email to do-science-scievents+unsubscribe@googlegroups.com

Why is the Google calendar so cool? :-)

<https://calendar.google.com/calendar/embed?src=doscience.iimcb%40gmail.com&ctz=Europe/Warsaw>

For volunteers

How to name the event? The most important fact, name of a speaker at the beginning! :-)

~~[IBB seminars] | dr Krzysztof Ginalski (CeNT UW) | Predicting structure and function of proteins~~

replace with

Ginalski Krzysztof PhD (CeNT UW) | Predicting structure and function of proteins | [IBB seminars]

(2) How to name an event? Use `|` to introduce a new line

Haley Wyatt PhD | Elucidating the molecular mechanisms of SLX4-nuclease complexes in DNA repair | [IIMCB Seminars] | #dna #molecularbiology #iimcb

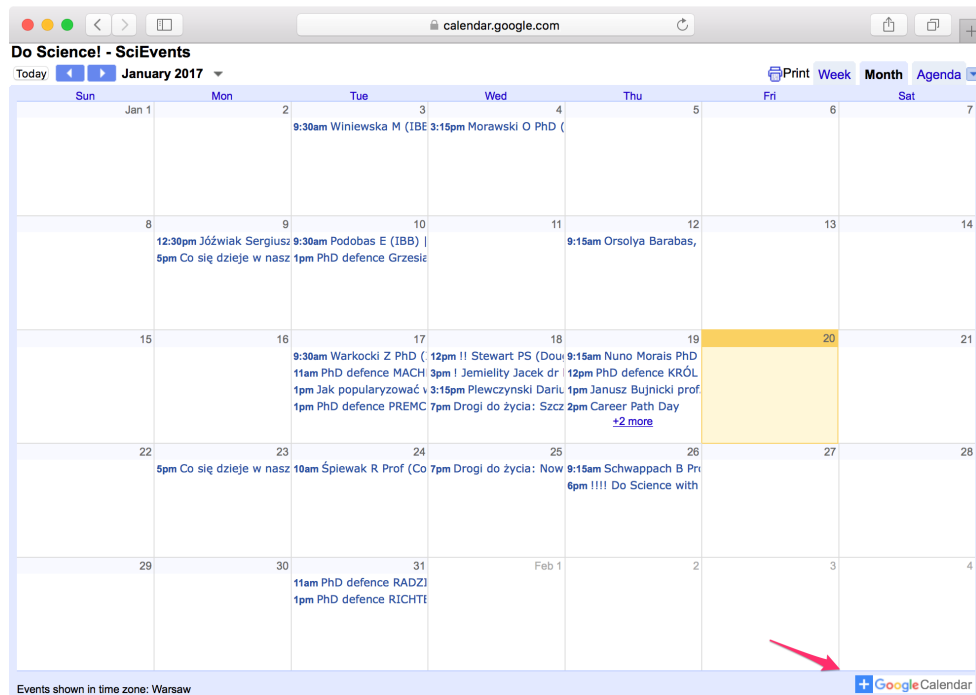

please, use `|` to give a signal to force a line break in the script:

Haley Wyatt PhD
Elucidating the molecular mechanisms of SLX4-nuclease complexes in DNA repair
[IIMCB Seminars]
#dna #molecularbiology #iimcb
events can be edited by “volunteers”.

Examples:

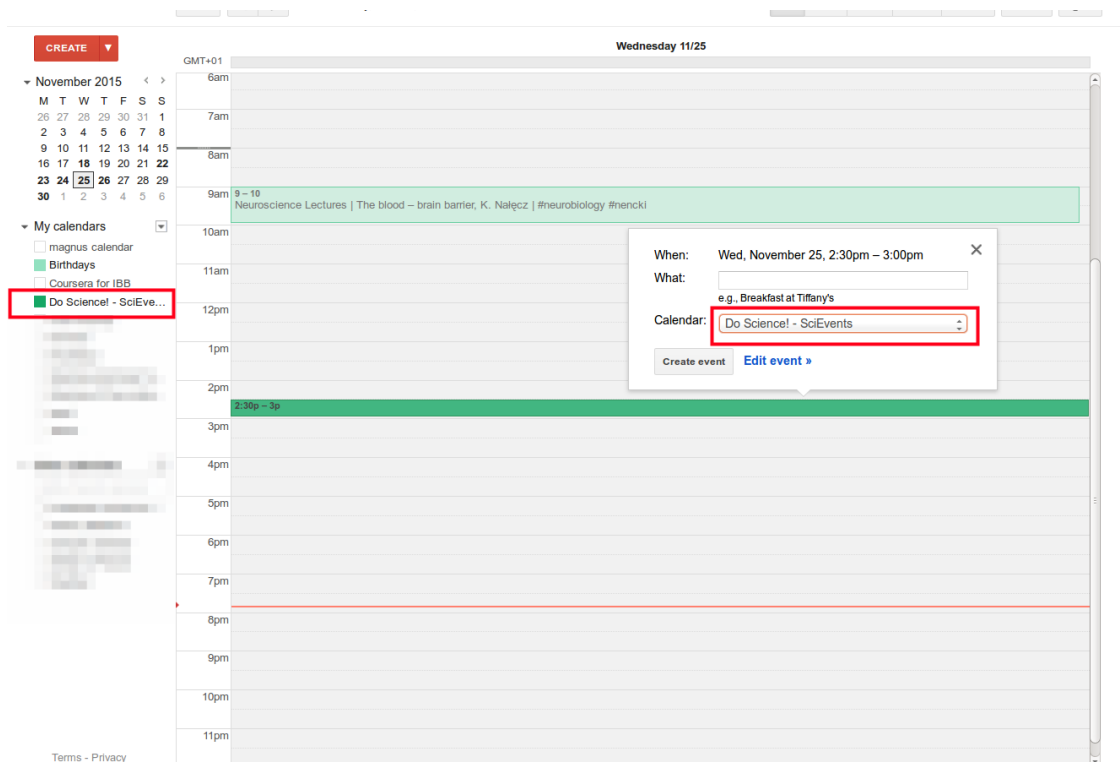

Kaźmierczak Piotr dr | Molecular mechanisms of hearing and deafness Institute for Neuroscience, Montpellier, Francja | [CENT Seminars]

How to add an event?

Add this calendar to your calendars

(<https://calendar.google.com/calendar/embed?src=doscience.iimcb%40gmail.com&ctz=Europe/Warsaw> , bottom-right) and then select the Do Science! - SciEvents calendar and add an event.

How to add an address of an event?

Please, instead of “sala A w Cyklotronie, ul. Pasteura 5a” which can not be mapped by Google Map use “ul. Pasteura 5a (sala A w Cyklotronie)”. The same information, but the second can be mapped by Google! :-)

Centre of New Technologies CeNT I, Stefana Banacha 2c, Warsaw, room 0142 (lecture hall on the ground floor) ([map](#)) -> [Stefana Banacha 2c \(](#)

[Centre of New Technologies CeNT I, room 0142 \(lecture hall on the ground floor\)\)](#)

IBB sala E -> [IBB \(sala E\)](#)

ul. Zwirki i Wigury 101, Aula CENT III UW -> [ul. Zwirki i Wigury 101 \(Aula CENT III UW\)](#)
