

1 - What do you want to have in your life?

1 Million Positive cash flow after expenses, 50 properties after debt reallocation, and a list of portfolios on stocks, shares and crypto income that I am confident and accountable for handling the loss. The plan I designed along the way I studied and learned. With my perfect woman, my brother, and my father.

I'm having the ability, mental strength, resources and power to further improve myself, provide for my family, build positive environment and institution, build businesses, help the people I cared, to invest any business I'm interested in, arrange my wealth into tangible assets as retained value away from inflation, and intangible assets to protect away from governmental control or malicious attack. At the same time, building more and more business in a percentage of shares to maintain ordinary earned income ensuring the money keeps coming in for my allocation in investment, and my capital gain on shares as the company grows with my knowledge, ability, and resources. Therefore, I can be eligible to help others to grow their business with what I have as I did what I preach and still earn percentages in shares of the relevant business as a passive income and as a consultant.

I will be in my current house sitting on my lounge calmly enjoying the fruit of my labor for the peace in my mind knowing that I have control on myself, and my circumstances.

With the house that I have modern interior design. Simple and Clean. With a Toyota Camry for casual use, Vellfire for family use, and Rimac Nevera with my last name in my garage .

After settle every expenses, still have 1 Million Positive Cashflow in a month and free to invest with the money to multiply it with my plans. The millions are infinity as 1 million grow into 2 million and so on.

2 - How will you know you achieved this?

I see myself achieve self-mastery, which includes self-control, emotional intelligence, and indefatigable to work.

I see the pictures of being respected, hear the voices of encouragement and admiration. Feel powerful and confident and proud to be there. Looking smart, fit with tailored suit that fit into my physique and sound very mature and intellect, which enable me to talk with people and they would just be listening without interrupting my flow of speech. Highest self-respect in myself, and bulletproof from all the other's non-constructive thoughts. Higher awareness in the influences and information I put into my mind which gives me more control on my sub-conscious mind. Thus, I control my effect and result. Feel very powerful.

3 - What will happen if you get this result?

I am powerful enough to provide for my family, my loved ones, people I cared and want to help with. To protect them physically and mentally away from spoiled culture and instill solid valuation to righteousness as they would listen to me because of my accomplishments and respects.

Mainly is the freedom, to have the ability to move, backup the plan when things, certain place, government just imposing unfair and immoral doctrine. To have the ability to move my properties and resources to a safer place , whether in different countries, banks, tangible and intangible assets. I have the resources to defend myself from injustice and hostile situation. To decide the environment and the people I want to work in and work with.

The eternal slavery is preventable, and I will have the ability to relocate and rebuild in a more strategic position. Perhaps, within the real world, I would have a place to go and have a group of like-minded people to fight this for the bloodline.

With that, I have the resources, intellect, ability and connections to resist the system instead of being controlled and inability to do anything. Wait and Die would not be an option.

4 - What will happen if you don't get it?

Live, consume, and die. That's the deepest fear in me.

Do nothing but wait for slavery to arrive when it is harder and even 0 chance to escape anymore and just die, work for someone, stress for living and be dead in obscurity.

If I dont make it, my bloodline would have to suffer from the systematic propaganda in mind,work and development. Not free to move, think and speak. The meaning of reproduction would be removed, and I would be forgotten.

My family would be disappointed and still work until the day they die.

My friends ignore me, disrespect me, making bad joke around the situation and inability, and cannot do anything about it.

Worst of the worse, trap in the environment with non-intelligence speech, no value, and no positivity. Mind filled with thoughts without light, hope, value, love, faith and chance to escape.

That is unpleasant to think about.

5 - What do you get to have by remaining the same person?

Comfortable, now everything is alright. House got food, entertainment is reachable, have some money in the bank, have cars to go anywhere. Have a good woman, have the ability to just live a normal life. Mainly I do not have to do anything, but I already have everything to survive with a good standard of living.

( BUT I WANT MORE, AND I SEE THE FUTURE DEVELOPMENT AND THE INCOMING NEVER ENDING SLAVERY. I SEE THE PATH THAT MAJORITY TAKEN AS A 9-5 IS LEADING TO NOWHERE, NO PURPOSE, NO HOPE, NO DEVELOPMENT, NO MEANING AND NOT BRINGING ANY VALUE, NOTHING SUSTAINABLE IN THIS MODE, JUST REPEATING IN THE SAME CYCLE! MOST PEOPLE JUST LIVE CONSUME AND DIE, WHAT IS THE MEANING OF BIRTH THEN? WHAT IS THE REASON OF BORN INTO THIS WORLD THEN?IT BURNS ME.)

6 - How do you know your dream life is worth pursuing?

I know something is happening, Andrew Tate just emphasizes it and make it so obvious that if people who don't take action are just had made a DECISION for themselves to be enslave. I refuse to do that, I want freedom since the moment I remember and understand things, I do not want to be chained, I want to protect and provide for my family, die for something purposeful. The goals and plans I have are just the bare minimum to enable me to have the ability to at least fight back the systematic brainwashed drama that everyone seems to accept it. I couldn't accept just to live after the salary, eat food, watch some shows, eat some burgers,ice cream, continue to live the same life for the less of the human conscious years and repeating the cycle again and again and again as I analyzed people around me, see through the end of the result for this behavior, I want to break it, I refuse to be inability to do anything when someone is threatening my life, eventually an obscure death. That's unpleasant to me.

7 - How will this affect your life in every aspect?

I have the ability and resources, and be who I want to be. I can help who I want to help, my family wouldn't have to worry about money anymore, even if they want to do something, I definitely can support them because I CAN.

I can invest any business and people I want. I can decide who to trust without letting it damage it too much because I have the mentality strength and can just cut it loose when the person loss me.

I want to capitalized businesses to provide value and job opportunities to society, and that will be under my control to make sure it sustainable.

8 - What will be different as a result of having this?

In my death, I know I did my best for my family, and my purpose. I have freedom and the chance to made the right choices.

I broke the chain, and the cycle. I develop an environment for my bloodline to be winning forever away from the brainwash and know the truth of the world and the importance of providing value to people surrounding.

In the living life, needless to worry about anything financially, can help anyone I want, can spend time with my family when I want, can go around with my brother and brought my family to vacation anytime. To fight when people try to take away this.
