

User Testing Questions

Here are some questions you can ask your users as they explore and test your environment:

- 1) What did you like about the environment?
- 2) What things did you try to do when you were testing? Were you able to get those things accomplished? Why or why not?
- 3) Did you find anything difficult or confusing?
- 4) Is there anything you would change or add?
- 5) Do you have any other thoughts or suggestions?
