

Introducing Classroom Add-ons

Google Classroom add-ons are now available! Add-ons make it easy to find, add, use and grade content from popular digital tools, right within Google Classroom. Add-ons provide a better experience and simplify the digital classroom experience for teachers and students.

GET STARTED WITH ADD-ONS

- **Access from your Assignment or Stream screens:** When creating an assignment or announcement, you'll now see an "add-ons" module. Select one of the listed add-ons to start assigning, using, and grading the content from those tools – without leaving Classroom! [More details here.](#)
- **Save time with a one-click login:** Once an add-on is selected, educators and students can easily access content by simply logging in with their Classroom account.
- **Easily add, assign, and grade your favorite content:** You can now find your favorite content and activities from popular educational tools, like Pear Deck, EdPuzzle, and Kahoot! without leaving Classroom. [Check out some ideas.](#)
- **Simplify your grading workflows:** Many of the add-ons have integrated time-saving features like auto-grading, insights and grade syncing. Various add-ons also provide the opportunity to grade right within Classroom and include personalized feedback when sharing a grade back with students. All add-ons sync with the Classroom gradebook, too.

TRY OUT THESE ADD-ONS

You will have access to the following add-ons:

- [CK-12](#)
- [Edpuzzle](#)
- [Formative](#)

- [Google Arts & Culture](#)
- [Kahoot!](#)
- [Nearpod](#)
- [Newsela](#)
- [PBS LearningMedia](#)
- [Pear Deck](#)
- [Sora from OverDrive Education](#)

Please be aware that we have not enabled all of the available add-ons.

PRACTICE SETS IN BETA ALSO AVAILABLE

Practice sets give teachers the time and tools to better support their students — from more interactive lessons to faster and more personal feedback. Transform your own teaching content into interactive assignments and use the autograding tool to cut down on manual grading time. Practice sets also help teachers figure out which concepts need more instruction time and who could use extra support, giving them quick performance insights to shape future lesson plans.
