

HSO COPY

Here's my avatar research: [Market research - Google Docs](#)

My Objective on this copy is to talk to a reader that struggles focusing on any task due to the lack of energy. And someone that is tired of drinking energy drinks or coffee and wants to find a new solution. I want the reader to feel fear, and that there's always a chance of losing their job because they can't seem to focus on anything they do

Subject line: "Your Position Has Been Terminated"

My world has been completely shattered

Considering how to explain to my wife and kids that I've lost my job.

In the past, I consistently maintained focus on tasks, which allowed me to effortlessly thrive in anything I set my mind to.

Now I always feel mentally foggy, struggle to focus, and lack energy for both family and work.

Despite trying coffee and energy drinks, I still experience crashes and lack lasting relief.

My wife suggests I consult a doctor, as she thinks I might be diagnosed with ADHD.

I have a strong dislike for doctors due to their high costs and my lack of trust in the prescribed treatments.

But then a friend recommended the product "Qualia Mind," and ever since then my life took a positive turn, bringing significant improvements to my life.

I have FINALLY become an improved version of my former self!

I never realized my mental capabilities and potential were this high.

I've obtained a superior job, substantially raised my earnings from my prior role, and gained additional energy to invest in my family.
