EACH DAY

Marvin Dreyer 2024

```
          A   6           E
Each day I repeat ninety-five times
    A                                E
ninety-five times the Greatest Name
            D          Dm        A              F#M
After ablutions I sit and intoning out loud
     B7                          E
enjoying each day the same.

      A                          E
I sometimes imagine somewhere in the world
   A            .                          E
someone might be repeating with me.
           D            Dm          A                F#m
And during my prayer my mind wonders off
       B7                          E
and in my mind's eye I see,

           A                  E
the Golden Age and all of mankind
  A                E
all doing the same.
              D           Dm                  A          F#m
What a wonderful vision when the entire world
         B7                          E
is repeating the Greatest Name

           A                          E
I can barely imagine the power released
A                        E
to that new society
              D           Dm          A                F#m
God’s promise fulfilled, His Kingdom on earth
     A           E           A
reflected in all humanity.
