MealViewer Menus, Nutrition & More

Mealweaver.com

User Profile – Allows important information to be at hand on all your devices. Parents can view menus for their children on their cell phones and online, through their profile. There's no need to enter the same information on multiple devices.

Allergen Alerts - By saving allergens to the user's profile, parents and students will be alerted when the allergen is present in the menu. This alleviates uncertainty and potentially dangerous situations for each student.

Item Rating – Allows students to rate menu items on an easy-to-understand 100-point scale, no matter age.

Nutrient Calculator – Allows users to calculate important nutritional information for each meal served in the cafeteria.
