Revised: Day Month Year

Accepted: Day Month Year

between 150 and 250 words. The maximum permitted similarity index is 20%. Please use this document as a template. The total number of pages should be a minimum of 7 and a maximum of 15 pages. If the paper exceeds the maximum page limit or if the final page does not conform to this template, it may not be published.

KEYWORDS:

Four to five keywords (The first letter of each keyword should be capitalized), italicized (written in English).

Authors are required to pay a publication fee upon final submission and submit the manuscript in both DOC and PDF formats. Ensure that the font size is 11 pt throughout the paper, except for the title (14 pt) and abstract (9 pt). Please include the authors' email addresses, positions, and departments in the author section above.

ABSTRAK

The abstract format is the same as the English abstract described above; however, it must be written in Bahasa Indonesia.

KATA KUNCI:

Empat sampai lima kata kunci (Karakter pertama dari semua kunci ditulis kapital/huruf besar)

ABSTRACT

The abstract must be written in English. Please read all information in this template carefully before starting to type. Use Arial font, size 9 pt. The article title should be between 50 and 100 characters. The abstract must include the problem statement, methodology, results, and conclusion. The length of the abstract should be

1. INTRODUCTION

Jurnal Agrotropika publishes scientific papers resulting from basic and applied research in the field of tropical agronomy, including crop and seed production, plant physiology, plant breeding, weed sciences, biotechnology, post-harvest, mycorrhiza, sustainable agriculture, agro-climatology, and agro-ecosystem. Articles should be written on A4-sized paper (210 mm × 297 mm) in single column format, using Arial 11 pt throughout the manuscript, including table and figure titles. Text within tables and figures should be 10 pt. Avoid the use of underline or **bold** within the main text. Section titles must be left-aligned and numbered. Leave one single space between the section title and the first paragraph, and no spacing between subsequent paragraphs. The first line of each paragraph should be indented 1 cm, and the text should be justified on both sides. Footnotes and underlining are not permitted.

2. MATERIALS AND METHODS

The article should consist of the following sections: title (in Indonesian and English), authors' names, abstract (in Indonesian and English), introduction, materials and methods, results and discussion, conclusion, acknowledgments (if applicable), and references. Use a maximum of three levels of headings. Section titles must be 11 pt, bold, left-aligned, and written in uppercase letters. Leave one blank line after each section title.

2.1 Subsection Title

Subsection titles should be 11 pt, bold, left-aligned, and each word should begin with a capital letter. Leave one blank line before the subsection title.

2.1.1. *Sub-subsection Title*

Sub-subsection titles should be 11 pt, italicized, with each word starting with a capital letter. Leave one blank line before the sub-subsection title. Avoid using headings of lower levels beyond this structure.

3. RESULTS AND DISCUSSION

Tables and figures should be presented as shown in Table 1 or Figures 1 and 2 in this example, or as wide as one column. Do not place text beside tables or figures, and avoid grouping them at the end of the manuscript. The contents and titles of tables and figures should be single-spaced, with a font size of 11 pt.

3.1 Tables

Table numbers and titles should be placed above the table, single-spaced, and justified on both sides. Table numbers must be sequential and appear close to the paragraph where they are first mentioned. Leave one blank line between the table, its title, and the surrounding text. Tables should fit within one column and be open style (no vertical lines).

3.2 Figures

Figure numbers and titles should be placed below the figure, single-spaced, and justified on both sides. Figure numbers should follow a sequential order, appearing near the relevant text

where they are first mentioned. Avoid reducing the size of the figures; a resolution of 600 dpi or higher is recommended.

Table 1. This is an example of a table format

Immersion Time	Observation Parameters							
	DB (%)	KP (%/hari)	KAN (%)	BM (%)	KNK (%)	PAPKN (cm)	PTKN (cm)	BKKN (mg)
12 hours	79,6a	37,96a	1,20a	21b	75a	16,80b	10,01a	10,20a
24 hours	89,4b	42,30b	2,40a	9,6a	83,6b	15,71a	11,36b	9,90a
LSD 5%	1,94	0,70	2,24	2,03	8,61	0,59	0,66	0,33

Note: Add explanations if necessary, for example: Numbers followed by the same letter indicate no significant difference according to the DMRT test at the 5% level.

Figures must be clear and display all text and labels correctly. Do not cut and paste figures from other documents. Ensure that the figures remain clear and legible when printed, and do not use borders around the figures. The figure size may occupy one column, as shown in the following example.

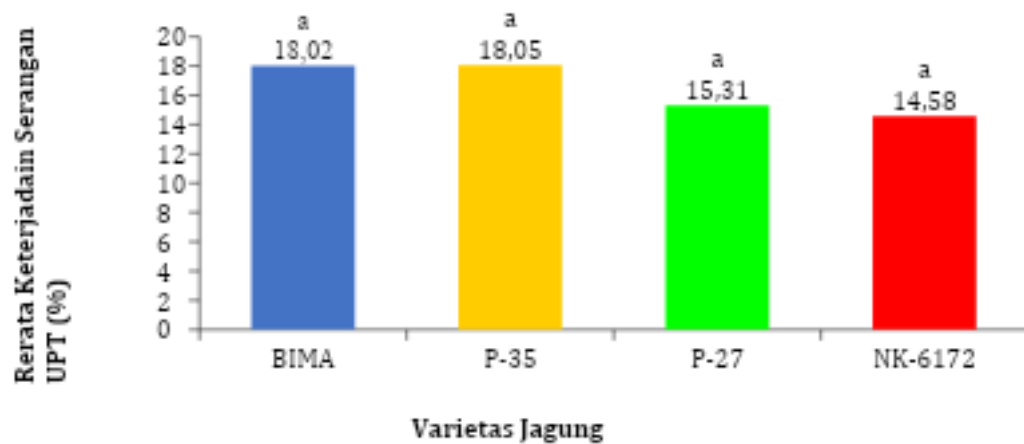

Figure 1. This is an example of a graph format

Figure 2. This is an example of a figure format

3.3 Formulas

Equation numbers must be written sequentially according to their order and placed in parentheses.

$$\sigma_{cr} = \sigma_{mu} + \sigma_R' (V_r)^{1.1} \quad (1)$$

Equation numbers should be left-aligned within parentheses. Symbols and notations must be defined when they first appear. Leave one blank line before and after the equation. The equation size should fit within a single column or span across two columns.

3.3.1 Color of Graphs and Figures

You must use color in the graphs and figures of the article. The online version of the article will appear in color.

4. CONCLUSION

The entire paper must follow this format and should not use a bullet or numbered system. Important! Please encourage others to publish their works in Jurnal Agrotropika.

5. ACKNOWLEDGMENTS

The acknowledgment section should include expressions of gratitude to all individuals, institutions, or organizations that have contributed directly or indirectly to the completion of the research. This may include research advisors, funding agencies, laboratory staff, colleagues, or collaborators who provided valuable input, technical assistance, or resources during the study. Authors are encouraged to clearly mention the source of funding and any grant numbers, if applicable.

6. REFERENCES

The references should be arranged according to the name–year system and may use reference management tools such as *Mendeley*, *EndNote*, or *Zotero (APA Style 7th Edition)*. References are listed alphabetically by author's name, followed by year, title, and source. Use single spacing within entries and 1.15 spacing between entries. Only sources cited in the manuscript should appear in the reference list. Primary (journal or scientific periodical) and recent references (*published within the last ten years*) are preferred, comprising *at least 75% of the total references*. *The minimum number of total references is 20*. The citation and reference system must use the name–year format (not numerical order). Each reference list must include at least one citation from *Jurnal Agrotropika*.
