INTERNATIONAL INTERDISCIPLINARY SCIENTIFIC JOURNAL "EXPERT"
REVIEWER APPLICATION FORM - DECLARATIONS AND COMMITMENTS

5. Statement of Interest

I hereby apply for consideration for inclusion in the reviewer pool of the *International Interdisciplinary Scientific Journal "Expert"*. I am willing to contribute my scholarly expertise, methodological competence, and professional experience to the independent peer-review process of the Journal.

I understand that approval of this application means that I may be included in the Journal's reviewer pool for consideration for future review invitations. Inclusion in the reviewer pool does not guarantee a manuscript assignment, and each manuscript-specific invitation is considered separately on the basis of relevant expertise, independence, conflicts of interest, methodological suitability, and availability.

6. Reviewer Declarations and Commitments

- I will accept a manuscript-specific review invitation only where I have sufficient subject and/or methodological expertise and sufficient availability to complete the review responsibly within the applicable timeframe.
- I will disclose any actual, potential, or perceived conflict of interest before accepting a review invitation and will decline or withdraw from the review where my independence could reasonably be compromised.
- I will treat manuscripts, review materials, author information, and editorial communications as confidential and will not share, reproduce, upload, or use unpublished material for personal, professional, competitive, or other unauthorised purposes.
- I will provide an objective, evidence-based, reasoned, and constructive scholarly assessment in accordance with the Journal's Review Ethics, Guidelines for Reviewers, and Peer Review Process.
- I will respect the Journal's double-blind peer-review model and will not deliberately attempt to identify the author(s) of a manuscript or contact them directly regarding the review.
- I will comply with the Journal's Generative AI Policy. Generative AI or AI-assisted technologies must not replace my scholarly expertise or be used to generate the substantive scholarly assessment of a confidential manuscript.
- I understand that reviewer comments and recommendations inform editorial assessment but do not constitute the Journal's final editorial decision.
- I will inform the Editorial Office in a timely manner of material changes to my institutional affiliation, contact information, principal areas of expertise, or other information relevant to reviewer selection and communication.

7. Supporting Information

Required: Please attach an up-to-date Curriculum Vitae (CV) containing information on academic qualifications, professional experience, research activities, publications, and relevant peer-review or editorial experience.

Optional: Additional documents or verifiable scholarly profile information may be attached where relevant to demonstrate expertise or professional experience.

8. Applicant Confirmation

By signing this application, I confirm that the information provided is accurate and current, that the attached materials genuinely represent my academic and professional background, and that I have read and agree to comply with the Journal's applicable reviewer requirements if invited to review a manuscript.
