

MCTE 2024 Spring Conference

Presenter Notes

Session title: *Who is Scarborough and why does she have a rope?*

Attend this session for a surface level overview and explanation of the Science of Reading. We'll go over basic terms, vocabulary, and the "Why" behind it all. In this session you'll create your own Scarborough's rope to use with your students and/or staff members and get the opportunity to collaborate with others about what you know and have learned. If you've heard some of the Science of Reading terms but are not sure what it means, this session is for you!

Presenter/s: Rachel O'Grady, TeachEachK12
