EXPERIENCE

Frontend Engineer (Contract), Mira

APRIL 2023 - Present

Nigeria

Achievements:

- Developing "Link and Online ordering," web applications streamlining ordering and payment processes at restaurants, hotels, and bars processing over 6000 orders , with an average value of ₦80M using Vue 3, Nuxt 3, Typescript, SCSS, Websockets, Zod, Pinia, and Google Maps API.
- Contributing to "Kitchen," a comprehensive dashboard for restaurants, bars, and hotels, enabling menu management, customer management, inventory management, discounts, sophisticated advanced reporting, payouts, wallets and a host of other features. Actively used by over 400 restaurants in Nigeria, across several states serving different customer categories using Nuxtjs, Printjs, Websockets, Chartjs, and Google Maps.
- Actively involved in building internal tools to help the customer support and operations teams; and enhance overall observability using Nuxt 3, Google Single-sign-on, and Chartjs.
- E2E testing using Playwright and Github Actions.
- Contributed to building Mira for Retail, which is an extension of our product offerings but more focused at Retail business. Onboarded retail business like Ashluxury.
- Successfully contributed to company growth leading to acquisition by Chowdeck in July 2025

Lead Frontend Engineer, Fluidcoins

AUGUST 2021 - MARCH 2023

Nigeria

Achievements:

- Spearheaded the development of "Flip by Fluidcoins," a mobile app that enables users to earn, spend, and save in stablecoins, achieving over \$1.5M in transaction volumes and amassing more than 25k users within nine weeks of launch.

- Created essential merchant frontend products, including the dashboard, checkout widget, payment SDK, and more, facilitating over \$20 million in transaction volumes and onboarding over 1000 businesses.
- Led the development of React Native, React, inline JS and Vue.js libraries for the payment SDK and implemented automated deployment using GitHub Actions.
- Spearheaded the development of "Fluidshop," a no-code e-commerce platform enabling merchants to sell products and receive payments in cryptocurrency.
- Mentored junior frontend engineers.
- Played a vital role in design reviews to ensure alignment with user standards, especially for those new to cryptocurrency.
- Acted as both a customer support and compliance officer for "Flip by Fluidcoins," enhancing user satisfaction.
- Conducted end-to-end testing using Cypress and GitHub Actions.
- Established the "Fluidcoins Blog" with a Headless CMS and Nuxt.js, providing users with up-to-date cryptocurrency information.

Senior Frontend Engineer, Bento Africa

DECEMBER 2020 - SEPTEMBER 2021

Nigeria

Achievements

- Collaborated with cross-functional teams to develop a wallet system, reducing salary disbursement time from a 3-day delay to instant.
- Led knowledge-sharing sessions on best practices and the latest conventions in Vue.js and frontend development.
- Contributed to expanding into Ghana and Rwanda by adding features such as tax calculation and multiple-country support.
- Implemented high-value features like "safeguard," "benefits," and "okra" to the dashboard, supporting the team in launching their features.
- Collaborated with the frontend team to create a design system using Vuetify and Bit.dev.
- Developed "Powered by Bento," enabling third parties like Edubank and Sterling to seamlessly integrate Bento's payroll module into their products.

Product Lead (People by Bento), Bento Africa

MAY 2021 - SEPTEMBER 2021

Nigeria

Achievements

- Collaborated with the backend team to implement role-based access controls, enhancing user access management.
- Led efforts to improve the overall quality and reliability of the product.
- Engaged with users, primarily HR professionals, to gather feedback and refine the product.

PROJECTS

Embedded Insurance Demo

SEPTEMBER 2022

Germany

- Collaborated closely with the CTO and Chief Product Officer to develop a sales demo tool for Monvix, a digital insurance technology company in Germany. The tool educates car manufacturers, such as Mercedes-Benz, on insurance cost calculations during the car purchase journey.
- Responsibilities included design implementation, data integration, and rater calculations using Vuex Actions.
- Leveraged Vue.js and Tailwind CSS for a lightweight solution.

Retroly

DECEMBER 2019

Netherland

- Contributed as a software engineer to Retroly, a tool designed for remote and co-located teams to enhance performance through retrospectives.
- Responsibilities encompassed converting Figma designs to code using Angular 8 and SCSS, as well as building APIs using Node.js, Express, MongoDB, and Socket.io for real-time data relay.
- Recognized as the 2nd product of the day on Product Hunt in December 2019.
- Currently used by prominent companies such as DocuSign, MackWeldon.com, Rentacar.fr, Figarocms, Smile2impress, Anevia, Groupagrica, and more, with 300+ daily users.

SKILLS

Core: Typescript/Javascript (React, Reactnative, Vue, Angular 8, Nuxt, Nextjs, Ethers.js, Storybook)

Familiar: PHP, UI/UX
