TRW user name: Peter,

Defining objectives

Momentum trader

Type of trades

Swing, long term: because i work full time, i can spend 1 to 1 ½ our

per day

Risk profile

Risk averse, tolerant: i have limited funding, but if my funding becomes better then i am   willing to take more risk, but i don't mind when i lose

Asset class

Stocks, commodities, underlying

TRW username Peter,

Strategy bootcamp

Entery parameters :Long position, look for a consolidation or squeeze and putt the
entry just above the highest point.
When it goes back up from a support/resistance on the 1h time frame and then goes above the 9ma.
When it goes out of a base box ore a 50ma box on the 1h time frame.
Short position, tried this on paper trading and i only lose than.

Exit parameters
take profit   : On the next resistance level, because i can only check it in the
evening after work.
stop loss   : 1/2 ore 1/3 from the take profit.
Risk per trade : Between 10$ and 50$ to start with.
