

# Title in Arial Font, Size 16, Bold, Capitalize the Each Word in the Title, and Do Not Exceed Two Lines

Emily A. Jones (student)<sup>1\*</sup>, John F. James (student)<sup>1</sup>, Susan F. Adam (mentor)<sup>2</sup>

1. School Name A, Address, City, State, Postal Code, Country

2. School Name B, Address, City, State, Postal Code, Country (if they are from the same school do not number them and enter it once)

\* Corresponding author email: author@gmail.com (DO NOT use your school email, must use personal email)

## Abstract

An Abstract is required for every paper; it should succinctly summarize the reason for the work, the main findings, and the conclusions of the study. It should not exceed 200 words. Please insert your abstract on this page.

## Keywords

Provide 4-6 words or phrases, separated with semicolons, that help search engines find your work. They should start with a general field of study (e.g. Social and Behavioral Science, Medical and Health Sciences, Chemistry, Biology, Physics, Earth Science, Engineering, Mathematics, Computer Science and Software Engineering, Materials Science, Economics, Finance), and should end with a very specific. such as; Chemistry; Organic Chemistry; Catalysis; Copper. Please insert your keywords one in each line on this page. You must use the Category and subcategories provided on our submission page as Keyword 1 and Keyword 2, respectively.

Keyword 1 (needs to be general field of study e.g. economics); Keyword 2 (needs to be from subcategory of the field of study e.g. microeconomics or organic chemistry); Keyword 3; Keyword 4; Keyword 5

## Introduction

Background information demonstrates why your research is necessary and important. Summarize literature on related work. State the goal of your research and how it differs from current literature at the end of the introduction section.

## Methods

Provide additional experimental details about your research, including methods, instruments, and related experimental results.

## Results and Discussion

Summarize the results and the methods used with data from experiments. Ensure that all tables, figures and schemes are cited in the text in numerical order. Trade names should have an initial capital letter, and trademark protection should be acknowledged in the standard fashion, using the superscripted characters for trademarks and registered trademarks respectively. All measurements and data should be given in SI units where possible. Abbreviations should be used consistently throughout the text, and all nonstandard abbreviations should be defined on first usage. Authors are requested to draw attention to hazardous materials or procedures by adding the word CAUTION followed by a brief descriptive phrase and literature references if appropriate. The experimental information should be as concise as possible, while containing all the information necessary to guarantee reproducibility.

## ***Subsection Heading***

This section is an example of how to create a subsection under a major heading. You are advised to break up results and discussion sections with subheadings to guide the reader for different outcomes of the research. Graphics and tables may be pasted directly into the template and positioned, as they should appear in the final manuscript. Figures and Tables should be numbered. Insert Figure and Tables between paragraphs. The text should not run along the sides of any figure. The artwork used in Figures should be 3.5" wide or less for single column and 7" wide or less for double column.

## **Conclusion**

Provide a summary of the results of the research in a concise manner.

## **AI Acknowledgement**

During the preparation of this work, the author(s) used [TOOL NAME] in order to [REASON, e.g., brainstorm research topics and improve language readability, image generation, etc.]. After using this tool, the author(s) reviewed and edited the content as needed and take(s) full responsibility for the content of the publication.

## **Acknowledgements**

Acknowledgments should be inserted at the end of the paper, before the references, not as a footnote to the title. Acknowledge any funding received or mentors, teachers, supervisors, etc.

## **References**

References and notes in the text should be indicated by superscript numerals that run consecutively through the paper and appear after any punctuation. Authors should ensure that all references are cited in the text and vice versa. Authors are expected to check the original source reference for accuracy. References should follow the American Chemical Society guidelines (The ACS Style Guide; [accessible here](#)). In-text citation should be OUTSIDE of punctuation. See our prior issues for guidance.

## **Authors**

This section is optional but highly recommended especially for student authors. Please provide a short bio about each author and their college, if decided, and major choices (for students). Each author is limited up to 50 words.

General guidelines:

- 1- Please read these instructions carefully and follow the suggested style.
- 2- If all contributors are from the same institution (high school) in that case no need to number each contributor.
- 3- Leave a space after corresponding author email and main text.
- 4- There is 8 pt after text spacing after each title. Please make sure to keep the template as it is.
- 5- Headings, such as Abstract, Introduction, etc, must be bold, Arial, 14 size with 8 pt after text spacing (Style 1).
- 6- The body text font size is 10 Arial and single spaced (Style Normal)
- 7- The following headings must be included: Abstract, Keywords, Introduction, Results and Discussion, Conclusion, Acknowledgements, References, Authors. Other subsections are optional and can be added by following the guidelines.
- 8- If you would like to add subheadings, their title should be italicized and bold in 12 font size with 8 pts after text spacing (Style 2).
- 9- Figures and tables can be in single column or double column. Figures and tables should be located at the top or bottom of the column following their first citation in the text (unless they are equations, which appear in the flow of the text). **All figures, images, and formulas need to be emailed as a separate attachment saved in .png format in high resolution.**
- 10- Table caption should be placed on top of the table (see sample):  
**Table 1.** Caption of the table (font 11, with 8 pts after text spacing), keep only first word capitalized, and end with a period.  
P.S. Tables must be referred in the article text with their numbers (see examples in common mistakes section below)
- 11- Figure caption should be placed after the figure graph (see sample)  
**Figure 1.** Caption of the figure (font 11, with 8 pts after text spacing), keep only first word capitalized, and end with a period.  
P.S. Figures must be referred in the article text with their numbers (see examples in common mistakes section below)
12. When ready, research article should be named as “**LastName\_FirstName**” or “**LastName\_LastName\_LastName**” (if multiple authors) and submitted as single pdf. Any images should be included in article as well as the originals should be attached to email separately in high resolution and .png format.
13. You may suggest reviewers for your paper. Please submit the following page with your paper.

### **Common Mistakes:**

1. Include the School Address in addition to School Names on the article,
2. Include an email address of the corresponding author (one email) after the address on the article.

3. Keyword selection: The first two keywords MUST be related to the general field of the study e.g economics vs microeconomics. The first keyword should be the general category and the second keyword should be subcategory, and the other three should be your own keywords. There should not be more than FIVE keywords.
  - Use commas instead of semicolons between the keywords.
4. All Tables and Figures MUST be referred to in the text, at least like in parenthesis where the table figure data is discussed (Table XX).
5. Table and Figure names in texts must start with capitalized letters. Eg. As shown in Table 3, cats are better than dogs, but Figure 1 shows that dogs can be as cute as cats. There is other evidence (Table 4) which may suggest that fish in a tank can be a good home pet for kids.
  - Fig. should be written as Figure.
  - Figure/Table legends/captions should have 1–2 sentences that highlight the main finding.
6. Reference numbers in text MUST be placed after period or comma and MUST be superscript. Also, when continuous numbers are used as reference in the text, instead of putting all in, they should be placed in a dash, such as 3–5 (instead of 3, 4, 5).
  - In-text citations should start at 1, be in numerical order, and should not skip numbers.
  - Reference numbers should not be in brackets and must be outside of punctuation.
7. If you are not sure, please check our published articles as you prepare your manuscript for guidance.
8. Papers should not have more than 15 pages of single-spaced text in 10 arial font (tables and figures not included).
  - Use US spelling.
  - Leave a space between words and abbreviations.
  - Leave a space between words and brackets.

**Additional Formatting Rules:**

- *Italicize: et al.; in vivo, in vitro, in silico*, gene names, species names.
- Have at least 4 authors before you use *et al.*.
- No in-text citations in the Abstract, and the Abstract should be only one paragraph.

## Reviewer Suggestions

IJHSR requires authors to recommend 3 - 6 qualified reviewers in the same discipline the research is conducted in.

Please provide the first and last name, institution, city/state/country of institution, and email address for each suggested reviewer.

Students should not contact potential reviewers ahead of time or during the review process. You should not send papers to potential reviewers. IJHSR will contact them using the information you send.

Recommended Reviewers must:

- Be fluent in English
- Be from different institutions (limited to 1 person per institution)
- Have not collaborated with the author's work
- Not be affiliated with the author's institution
- Should have PhD in the research area or more than ten years of experience in the field
