## Quick Research of Short List Topics

Instructions: Once our class has collected a short list of ideas, we now have to research each topic. Complete the following table to determine the impact and significance of each topic. Answer in complete sentences and have one group member submit to Google Classroom when finished.

Your group will be presenting your research to the rest of the class (on another day) so we can all learn more about this topic.

To make sure everyone in your group contributes fairly, please list all group members here & assign them a color. Everything you write on this doc, should be written in your assigned color
