

PLC: Fall MAP Data Analysis

SAMPLE AGENDA

• MAP Data Review	• Review Data Consider these questions: • What do you see as cause for celebration? • What does this data tell you? • How can we use this data for instructional next steps? • What supports do you need at this point?
• Tiers of Intervention	• Which students need Tier 2 Intervention? (We will not put students in Tier 3 until additional assessment has occurred.) • Discuss what you/your team will use/do to address Tier 2 students.
• Learning Continuum	• Log-on and review how the Learning Continuum can be used to determine needs and plan for closing gaps.
• Goal Setting	• Review the Achievement Status and Growth Summary Report • Consider the percentile before determining a goal for the students. (In order to close gaps some students may need to make more than one year's worth of growth.) • Think about when and how you will goal set and how you will include students in this process.
• Student Data Sheets	• Discuss and begin to work on a data collection sheet for MAP and common assessments for 17-18.
