

## Company Portfolio

Our companies are so excited to meet you! Find information below of all the companies joining us. During the event, you'll select to meet company representatives based on their company size. We recommend that you research the companies and also apply online!

### Company Size: 1-20

#### Aquarium

[Aquarium](#) makes it easier for machine learning teams to build and improve their ML models. We build tooling that helps analyze ML systems, uncover failures / problematic biases in their data, and fix these problems by intelligently editing their datasets. Our customers are applying ML in a variety of industries - by building delivery robots, analyzing plant health, monitoring construction sites, to name a few - and we help them make their ML systems more fair and robust. [Here's a video](#) of what we've built!

We just graduated from the latest YCombinator batch and have raised a seed round from a top-tier VC. Previously, our founders worked on self driving cars at Cruise, leading the perception and ML infrastructure teams. We're looking to grow our core engineering team with awesome people who'll shape the future of Aquarium, both as a product and as a company. If this excites you, come chat with us!

#### Arist

Arist helps organizations like DuPont, GE, and the State of California create text message-based courses, which are ~10x more effective and accessible than traditional video-based courses. With use cases ranging from onboarding and culture to compliance

and safety training, Arist is a fast and cost-efficient way to make remote learning and training more effective and enjoyable.

Job Listing Page: <http://lrn.st/jobs>

## Berbix

Here at [Berbix](#), we make it possible for companies to instantly and securely validate photo IDs online. Our cofounders previously led the Trust & Safety team at Airbnb prior to starting Berbix in 2018. We just raised our [Series A](#)! Our mission is to make the internet safer by allowing companies to confidently know there's a real human on the other side of the keyboard, while upholding user privacy as a core principle. Our current product enables companies to instantly verify photo IDs in an online setting without waiting around for manual review.

Check out our [about us](#) & [careers](#) page if you're interested in learning more!

## Bloom

Bloom (formerly Together) is a YCombinator backed startup based in Oakland, CA on a mission to use software to bring people together. Bloom is a dating community that organizes group dates in parks. Members tell us who they want to meet and we organize 6-8 person meetups in parks. And, with a strong consent culture and referral-based community, we're the safest place to meet new partners and friends.

The team is Lauren Vegter, Aubrey Tull, and Dan Rhodes. Lauren spent 5 years at Facebook, most recently leading viral user growth for Instagram from 700M to past a billion users in two years. Aubrey has ten years of engineering experience from Stripe, Twilio, and Netflix. Dan is a former YC founder and was the first engineer at Atrium.

## Elemeno Health

Are you mission driven, looking for an exciting opportunity that brings meaning and value beyond "the work"? Elemeno's platform uses technology to give frontline healthcare providers the knowledge they require to provide consistent care AND save lives.

Inconsistency in healthcare is a huge problem, resulting in medical error (the #3 cause of death in the U.S.) and massive waste.

Elemeno Health is a UCSF and YC (S16) backed B2B SaaS for healthcare facilities. Point of care microlearning as a service, customized to support frontline staff with bite-sized training and communication at their fingertips. Drive practice consistency at scale, reducing costs,

increasing safety and improving outcomes. We are deployed in hospitals, post-acute care, and clinic systems nationally.

## Apto Payments

Apto is a leading-edge card issuance platform. We help companies issue new kinds of cards in new ways. We do it with fewer constraints and more creativity, for a better cardholder experience. Founded in 2014 as Shift Payments, the company worked with Coinbase to launch the first bitcoin debit card. Today, as Apto, we have broadened our mission, finding new ways to connect people to their assets by helping companies successfully launch innovative, customer-centric card programs to market.

## Dsolvers

Are you interested in joining the Dsolvers movement to level the playing field for BIPOC & women. We mentor BOPIC and women to be more successful in their professional and personal lives. And, we help make workplaces more inclusive by encouraging to bring your whole identity to work. We are looking for funding at this time.

## Blue Onion Labs

Blue Onion Labs helps finance and accounting teams trace and reconcile order transactions to create a single source of truth. Often, different teams use different numbers for key business metrics, which makes it challenging to trace a transaction through every system. Blue Onion Labs' software provides the benefits of an ERP without the cost of a traditional implementation — starting with order-to-cash reconciliation for consumer companies.

## Jupiter

Jupiter is a grocery automation service that takes care of the shopping, delivery, and even meal-planning. We learn about your habits, plan your orders, and help you figure out what's for dinner.

## Boundary Layer Technologies

Boundary Layer Technologies is a startup that is building high speed container ships using hydrofoil technology.

## BuildBuddy

BuildBuddy provides enterprise features for Bazel — the open source build system that allows you to build and test software 10x faster.

## Census

Hi there, we're Census! We're data nerds that help companies make their data actionable. We spend our days thinking about clever ways to construct queries and hack on APIs to help our customers take data and use it to automate sales, marketing, and other business activity. We're a tight knit team based in kitchens and living rooms around the Bay Area. We love building thoughtfully designed products, clever problem solving, and creating real human relationships with our customers. We just [raised funding](#) and now we're looking for talented people who enjoy the ambiguity of building a product from scratch and working directly with customers to create something that has a lasting impact.

Take a look at the [SWE and Data roles](#) we're hiring for and say hello on Glimpse!

## Coach

We're building "Noom" for mindset training.

People need help reaching personal and professional goals, like leaving a job, starting a company, or writing a book. With our app, you come to us with any goal, and we'll match you with a mindset coach. We'll also give you a plan and guide you through a tested process for making it happen. What's different about the coaches on our platform is they're sports psychologists who normally work with pro athletes. Our unique insight is the same techniques that work for pro athletes also work for non-athletes. Our unfair advantage is our coaches deliver these results faster than therapy and at a fraction of the cost of executive coaching. We're looking for a SWE who wants to build a new type of coaching platform from scratch - starting with a mobile app. On the back end, we're building a company culture that supports a fast-paced creative flow. We use lean-startup-inspired, metric-based experiments to understand our product and our customer before we write a single line of code. Our mission is to deliver mindset coaching at scale so anyone can overcome the obstacles that stand between the life they have today and the life they want. Our company values are people, optimism, integrity, service, health, equality, and love. We're looking for people who share these values, mission, and purpose. We also believe fun is a performance enhancing drug.

We offer a competitive salary, equity, and benefit package - including subsidized access to the mindset coaches and personal trainers on our platform. Contact [jenn@getcoach.io](mailto:jenn@getcoach.io)

## Coral Genomics

Coral improves drug development and deployment by utilizing genomic data from patients to determine how they will respond to a drug before they get treated. This will result in more more efficient clinical trials and healthcare delivery.

## Cortex

Cortex is a Sequoia and YC backed company that helps engineering teams understand and improve their services. By aggregating data from tools like Datadog and Okta, we help teams understand their architecture at a glance – everything from ownership to runbooks. Using this data, we enable engineers to build report cards that score services against initiatives and service quality standards, helping teams build high quality software and instill a culture of quality.

The tools teams use today (excel sheets and confluence) are cumbersome and rudimentary - we're on a mission to create a new category of engineering tooling, to solve the organizational complexity of microservices.

## CrowdAI

At CrowdAI, we're on a mission to put the power of AI in the hands of everyone -- even if you aren't a data scientist or engineer. Our platform can be used to create AI for visual analysis - we help users create computer vision models to extract meaningful insights from unstructured images and videos. The same technology that has been adopted by data-sensitive government agencies to create encrypted algorithms deployed on-premises or in the cloud is now available on the commercial market.

CrowdAI is built by engineers from Stanford, University of Oxford, Google, and IBM Watson and trusted by brands encompassing pharmaceuticals, medical devices, oil & gas, government agencies and more. Advisors include former CEO of Google Cloud, Diane Greene and the CEO and Founder of Yahoo, Jerry Yang.

## Daily.co

Daily.co is a video chat API that makes it simple to build with video. A developer can add live video to any website or app — in minutes, on a global infrastructure, with features for every use case and team. We serve millions of live video minutes each month, across the world.

## Daybreak Health

Daybreak Health is a digital mental health clinic built to help millions of adolescents access effective mental health care. Our digital platform gives teens access to high-quality therapists. Our clinical program is designed for teens in particular and we're actively serving patients in California. Our mission is to build mental fitness in young people by creating universal access to effective mental health care.

Open Positions: <https://daybreak-health.breezy.hr/>

## Dear Brightly

Dear Brightly ([dearbrightly.com](https://dearbrightly.com)) is a women-led skincare company powered by telehealth technology. We offer the easiest way to get dermatology services and the best science-based skincare products online.

## DSolvers

Are you interested in joining the Dsolvers movement to level the playing field for BIPOC & women. We mentor BOPIC and women to be more successful in their professional and personal lives. And, we help make workplaces more inclusive by encouraging to bring your whole identity to work. We are looking for funding at this time.

## Fly.io

Fly is a platform for running app servers close to your users.

## Kapor Capital

At Kapor Capital, we invest in seed stage startups that close gaps of access, expand economic opportunity and make a positive impact in our society and the economy. Our entrepreneurs come from all backgrounds, with a special focus on people of color, women, and other historically underrepresented groups who are inspired by their lived experience to shape the future and inform the questions they ask and the problems they identify that give rise to profitable, tech-driven solutions.

We are an Oakland-based fund that understands that start-up companies have the ability to transform entire industries and believe that startups can leverage information technology to solve real world problems and tangibly improve the lives of millions through innovations in the fields of education, finance, health, work, justice and more.

## Glide

Glide turns spreadsheets into beautiful, data-driven apps that you can share with anyone and update anytime.

## Glimpse

Glimpse provides a platform for brands that want to expand their reach by connecting them to short-term rental properties for product placement opportunities. Backed by Y Combinator.

## Hatchways

We help software engineers new to the field get practical work experience and land employment at tech startups. We use take-home assessments instead of resumes and work simulations instead of interviews to help software engineers that come from non-traditional backgrounds get noticed by employers. Our mission is to help bridge the gap between education and employment so people who are getting overlooked in the hiring process can have employment opportunities they otherwise wouldn't.

## Hellosaurus

Hellosaurus is reinventing children's programming for touchscreen audiences, initially focusing on kids between the ages of 3 and 8. Rooted in early childhood education principles of engagement, with a belief that children's content should leverage mobile device capabilities so kids play instead of just watch, Hellosaurus is developing not just interactive kids' shows but also the tools for creators worldwide to make their own shows for its platform.

This easy-to-use software platform includes tools that empower creators of high-quality kids programming -- especially those that have been using YouTube as a primary content hub -- to move beyond passive content as well as a single distribution platform to share creations with families everywhere.

## HelpNow

With a dream of saving more than 70,000 lives a day, HelpNow was started by 3 IITians, driven by first-hand experiences of a broken ambulance system in India. Over the last 15 months of R&D with inputs from domain experts, HelpNow has built the largest network of private ambulances in Mumbai, leveraged ridesharing cabs into "MedCabs" and made technological optimisations to truly create the safest ambulance service in India.

Launched on Maharashtra Day, 1st May, we invite you to join our mission, to give quality help and save 70,000+ lives DAILY

Here

[Here](#) is a next generation video communication platform where teams and friends create personal, shareable and flexible video rooms. We do this by providing a real-time, shared space where people meetup to video chat, write, draw, screenshare, decorate and move around--all in a browser.

## Layer (Layerci.com)

LayerCI is a Y Combinator-backed company that provides pre-configured VMs for you to run your tests on a moment's notice. All you have to do is put Layerfiles similar to Dockerfiles anywhere in your repository, and we'll start preconfigured machines to run your tests for you

## LayerCI

Layer is a Y Combinator company that is creating the world's first cloud-based [Continuous Staging](#) platform made for developer velocity and collaboration in distributed software teams. Our platform helps prevent expense bugs from going unnoticed, sharing changes with teammates no matter the timezone, and making sure development changes don't break customer experiences.

The Layer platform was inspired by the CEO's own experience running a 10+ person developer team, where CI/CD pipelines took forever and sharing changes with non-tech stakeholders was painful. We're looking for full-time backend developers as part of the founding team passionate about helping software companies do their best work, everyday. Apply for Layer here: <https://forms.gle/xQa72k3RdJy4AHTT9>

## Literably

Literably is a fast-growing education technology company that provides early literacy assessment software to elementary schools. Using our product, K-5 students can read out loud into a mobile device, generating key data for reading instruction that would otherwise be collected manually. This saves teachers enormous amounts of time and drives critical intervention decisions for young readers. We currently serve over 500 schools, and among our customers are several of America's largest school districts, including Orange County Public Schools and Spokane Public Schools.

We are looking for an experienced software engineer with both back-end and front-end skills to build out our core assessment processing system. We work in Python/Django but specific experience with this stack is not required. Familiarity with signal processing, audio data analysis, machine learning, and automated speech recognition is a plus.

## Mashgin

World's fastest AI powered Touchless self-checkout ecosystem. YC W15.

<https://www.mashgin.com/#>

## Memora Health

Memora Health has developed the most comprehensive end-to-end platform for analyzing and structuring fragmented health care data. We use artificial intelligence to digitize and automate patient communication workflows, ultimately helping organizations dramatically improve patient outcomes and operational efficiency.

Memora supports a full suite of virtual care systems from automated patient intake and scheduling to telemedicine visits to accelerated billing and documentation in a singular platform, streamlining care delivery. We are building the next-generation operating system for care delivery. Memora Health is backed by some of the largest healthcare venture funds and angels in Silicon Valley and is a very technically-focused team.

You can learn more about openings at <https://memorahealth.com/jobs>.

## MindsDB Inc.

At MindsDB we are solving the problem of answering predictive questions from your existing database without the need for a data scientist or a machine learning expert. We do this by turning existing databases into predictive tools. We have an AI layer that sits in between the existing client and the database, which expands the query language so you are able to ask predictive type questions. It automatically does all of the work a data scientist would normally do, so you don't have to.

## PostEra

[PostEra](#) offers medicinal chemistry as a service. Drug discovery R&D is slow and expensive and this limits biotechs and pharma from getting new drugs into development and new cures to patients. PostEra is building a one-stop-shop for medicinal chemistry, powered by machine learning, to serve the world's ever expanding community of drug hunters while also leading the world's largest open-science initiative to find a COVID cure; [COVID Moonshot](#).

We're urgently looking for talented Web Dev folks to join the team and you can see our full list of open roles [here](#).

## Pulley

Pulley's mission is to make it easier for anyone to start a company. We strongly believe that more startups should be created, and that founder-led companies are more successful in the long term. With Pulley's cap table management tools, companies can better understand and optimize their equity. Starting a company is hard enough. Managing a cap table shouldn't be.

## Savvy

Savvy is solving one of the fundamental issues with US healthcare -- employer-sponsored health insurance. The current health insurance model puts an undue burden on employers, gives little choice and personalization to the consumer, and creates poor incentives for the entire healthcare system.

Countless health and policy experts identify this as one of the "original sins" of the dysfunctional US healthcare system. For the first time in US history, new regulations allow companies to offer tax-advantaged health budgets to employees instead of pre-selecting health insurance packages. Savvy is building the first platform to facilitate this new way of offering health insurance.

## Smarking

Smarking is a San Francisco-based technology company founded by two MIT PHD professionals. With a team of enterprise leaders, we're on a mission to enable highly efficient urban mobility by providing cutting edge solutions to parking leaders.

We work with leading commercial real estate owners and parking management firms such as J.P. Morgan, Brookfield Properties, Hines, VPNE, Tishman Speyer, and many others, to maximize the return of their conventionally overlooked parking assets.

Current Opening: [Implementation and Technical Partnerships Manager](#)

## Tandem

Tandem (YC S19, A16Z-funded) is a virtual office for remote teams, where you can see who's online and talk/video/screenshare in one click. We're hiring for our founding team, which has engineers from Discord, FaceTime, Twilio, Skype, Facebook, and Yahoo Messenger. You can try it at [tandem.chat](https://tandem.chat) + [Here's a 2-minute explainer!](#)  
([Jobs page](#))

## Thryft

Thryft is an online marketplace for secondhand clothing & accessories from thrift & vintage shops across the United States. Our mission is to reinvent the way we buy, sell, and think about secondhand clothing, while bringing brick and mortar to the forefront of the thrifting movement. Thryft is founded and led by a team of UC Berkeley students who are all avid thrifters passionate about technology and sustainable fashion.

## Treasury Prime

Treasury Prime is transforming banking for the 21st Century. We partner with banks to build the technology to enable a new wave of fintech startups. Through simple, unified APIs, we are modernizing financial technology.

<https://treasuryprime.com/careers>

## Turing Labs Inc.

Turing software provides a virtual product development platform to help consumer packaged goods companies develop fail-safe products in record time. Turing takes a wide range of product-related data, reduces the need of iterative testing by at least half, and enables product development team to quickly go from idea-to-commercialization

## Welcome

Welcome is a virtual event platform for high end, branded events. Using Welcome, a single person can create an experience that feels like an apple product launch. We've built the first five-star hotel in virtual events and have the product and services to match. We're a Silicon Valley based, well-funded startup backed up by top VCs. Our investors, founders, and advisors are from Google, Facebook, Yahoo, InstaCart, Dropbox, Slack and more. We're not officially launched, yet we've already signed customers like Lightspeed, Brandweek, and Kleiner Perkins. Welcome is composed of a diverse group of entrepreneurs, dreamers and builders who believe that exceptional, high-quality experiences can seamlessly bring people together, invite collaboration, and provide a meaningful sense of belonging. We're experiencing accelerated growth, and if your passion aligns with ours, we look forward to hearing from you.

Jobs page: <https://jobs.lever.co/welcome>

## Valencia Data

Well funded early stage opportunity, funded by top tier investors and DEI leaders like General Catalyst, Kapor Capital and Felicis. Starting a company has become easier, but growing a company is more complicated than ever. We are rethinking the core financial infrastructure to help startups (and eventually all entrepreneurs) improve their chances of success. We help founders better understand their financial health, use machine learning to proactively monitor the accuracy of financial data to improve trust and transparency, provide an easy path for monitoring pay equity, and improving outcomes for all stakeholders - shareholders, partners and hardworking employees. Come learn more!

## Volley

At Volley, we build voice-controlled games and entertainment for Amazon Alexa and Google Home. Some of our top hits include Song Quiz, a name that tune trivia game, and Volley FM, a personalized morning news service. We bring joy to millions of people every month and are continuing to create new and exciting experiences for users! We're a tight team of 20 that enjoys working together. We love coming together over team lunches, happy hours, and the occasional karaoke session. During quarantine, this has evolved into virtual dance lessons, Zoom games, and a VERY active cooking channel in Slack. We can't wait to meet you!

## Vori

Vori (YCW20, Greylock-backed) is a marketplace empowering food retailers (grocery stores, convenience stores, bodegas) to discover and replenish products from thousands of CPG brands and distributors. We create simple technology for retailers so they can focus on building and running their business.

Check out our jobs page to learn more: [vori.com/careers](https://vori.com/careers)

## Zendar

At Zendar, we are building the highest resolution automotive radar in the world. Our product combines the benefits of radar, such as long-range and all-weather operation, with the resolution of lidar.

We want to make autonomous driving safe and accessible for everyone.

[Career page](#)

## Company Size: 21-100

### Applied Intuition

As the foremost enabler of autonomous vehicle development, Applied Intuition equips engineering and product development teams with software that makes it faster, safer, and easier to bring autonomy to market.

Applied's suite of products, focused on simulation and analytics, delivers sophisticated infrastructure built for scale. Industry leading companies of all sizes use Applied to comprehensively test and rapidly accelerate their autonomous vehicle development.

### BioRender

BioRender is revolutionizing how science is communicated, one graphic at a time (you can think of us as the Adobe or Canva for Science!). We're on a mission to accelerate science by empowering all scientists to quickly and easily communicate their research.

We are a team of passionate engineers, science illustrators, designers and entrepreneurs backed by an incredible group of investors, including YCombinator.

### ClassDojo

Founded in 2011 and based in San Francisco, California, ClassDojo is the leading communication app for primary schools around the world. It helps teachers, families, and kids share more often and more positively about what's happening at school and at home - including photos, videos, messages, and positive feedback.

The company is one of the fastest growing education technology companies of all time, used and loved by millions of teachers, parents and students in 90% of K-8 schools in the US, and 180 other countries.

### Deepgram

Deepgram has reinvented Automatic Speech Recognition (ASR) with a complete, deep learning model that allows companies to get faster, more accurate transcription, resulting in more reliable data sets – on-prem or in the cloud. And we do it all with lower hardware and usage costs so we're a hell of a lot more scalable than big tech players.

## Diffbot

Diffbot is a profitable AI startup rooted from Stanford University. We're attempting to be the single data repository for all the knowledge and information in the world by way of our Knowledge Graph and services. Currently, we've achieved the world's largest knowledge graph, and are on our way to making the most accurate one. We're looking for talented Software Engineers and Machine Learning Engineers to come join our team of superheroes!

\*\* Will be attending only Wednesday the 30th between 3pm - 4pm PDT.

## FightCamp

FightCamp's goal is to create the ultimate at-home workout experience for busy professionals committed to their fitness goals. In order to do so, FightCamp offers interactive boxing workouts. Workout output is tracked by motion trackers that calculate the speed and the amount of punches thrown during a workout. FightCamp was launched in February 2018. In just over two years, FightCamp's subscriber base has reached over 10,000 members throughout the US. FightCamp is Y Combinator portfolio company.

You can learn more about us: <https://joinfightcamp.com/>  
<https://apps.apple.com/us/app/fightcamp/id1328562100>  
<https://www.cnn.com/2020/04/21/cnn-underscored/fightcamp-review/index.htm> |  
<https://www.businessinsider.com/fightcamp-at-home-boxing-system-review>

## Flipboard

Flipboard's mission is to be the world's most valuable platform for the discovery and sharing of stories that help us understand and engage in our world. On Flipboard, quality articles, videos, podcasts and products are curated everyday for millions of people around the world. It's a platform that lets people spend time on their interests, develop deeper understandings, and share the best ideas with others through their own Flipboard Magazines.

Flipboard brings together high-quality content, important points of view, and communities of enthusiasts to redefine the way content is discovered, distributed and monetized around the globe.

<https://about.flipboard.com/careers/>

## HiOperator

HiOperator provides customer support as a service. Banish your ticket backlog and free up your in-house team for higher level tasks. We are a YCombinator S16 and 43North company based in Buffalo, NY.

## Bubble

Bubble is a visual programming platform that lets anyone create web applications with no coding experience. Apps built on Bubble can range from simple prototypes to complex marketplaces and platforms: Airbnb, Twitter are typical examples of what you can build in a few days without writing any code. You build your product by pointing and clicking, and Bubble handles the infrastructure and DevOps automatically.

Today, Bubble serves more than 250K customers, including many thriving businesses, some YC companies, and a company that has raised \$365M in funding.

## Injective Protocol

Injective is the first front-running resistant, layer-2 exchange protocol that unlocks the full potential of borderless DeFi by supporting margin trading, derivatives, and futures.

## Human Capital

Human Capital is a Venture Capital Firm with over \$200M in Assets Under Management. These investments include six different unicorns; being early investors in Snowflake, Livongo Health (NASDAQ: LVGO), and Brex (their first investor!). We have successfully connected students with mission-aligned, high-growth companies in our portfolio (some of which are still stealth). Some joined unicorn companies when they had fewer than 50 engineers — including Snowflake, Clumio, Robinhood, and more. Those are the kinds of jobs that change careers.

We don't just match engineers to our portfolio companies, we also help throughout the recruiting process by:

- Benchmarking your career and receiving negotiation support
- Building a relationship with our venture firm which takes pride in being an early investor in engineer-led companies.

## Middesk

Middesk (YC W19) offers business verifications, legal and regulatory checks, and industry classification products for companies selling to businesses. Today, there are no reliable and scalable solutions for understanding the legitimacy, trustworthiness, or credit capacity of a business. We're building the end-to-end solution for companies to verify, screen, and monitor their customers. To do this, we're looking for individuals who think about problems holistically and in-depth, who are relentlessly curious, self-starters, and determined to drive ideas from inception through to completion.

## MiQ Digital

We're MiQ, a programmatic media partner for marketers and agencies. Our better connected approach to programmatic advertising means we can connect data, discover insights and activate them in high-performance campaigns to deliver real business outcomes for our clients in an increasingly divided world.

Making the most of your data is complex. You need to connect all your first party data, enhance it with the right second and third party data, analyse it with data science technology and resources, then use the insights you gather to build creatives with the right messages and target them to the right audiences with expert programmatic trading.

We connect the right people, industry partnerships, and technology in a complete programmatic stack so we can solve your precise business challenges by maximising the value of your data.

## OneSignal

OneSignal is the leading push notification platform for companies in need of a best-in-class user engagement solution. OneSignal supports mobile and web push notifications, in-app messaging, and email messaging, allowing organizations to engage with users on a personal level. OneSignal sends over 8 billion push notifications daily, peaking at over 6,000,000 notifications per second, and is trusted by over 1,000,000 developers worldwide.

OneSignal offers features like A/B testing, real-time reporting, and segmentation which help companies gain invaluable insight into their marketing processes and enhance their engagement strategies. Companies of all sizes trust OneSignal to boost retention, increase engagement, and improve communication with their users.

## PickTrace

PickTrace provides workforce and harvest management solutions for enterprise farms. We are building the agricultural management system of the future, with unparalleled customer empathy in an under-teched industry. Our SaaS product serves the largest berry, citrus, and apple growers in the world and is used by tens of thousands of farmworkers each day.

PickTrace is a YCombinator company, and raised a Series A in late 2018 from a long-term oriented investment firm with a terrific track record of building multi-billion dollar software companies. Since then, we have grown from 10 to 25 employees, including an outstanding product & engineering team focused on best-of-breed modern technologies. We serve clients from across the United States, Canada, Latin America, and Australia.

## Ramp

Ramp is a technology company building the next generation corporate card to save businesses money. We're redesigning how corporate spend should be managed from the ground up to save time, money, and ensure control. We provide companies higher card limits, insightful saving opportunities, automated expense management, lightning fast receipt matching, seamless accounting integration, and more.

Ramp was founded by the same team who built, scaled, and sold Paribus to Capital One, spearheading Capital One's push into saving technologies. Their group at Capital One enabled automated savings on online purchases, and put over \$100 million back in consumers' pockets. Ramp is committed to providing that same value and savings to businesses. We are backed by Founders Fund, Coatue, and Box Group, in addition to an exceptional collective of more than 50 founders of leading companies (representing over \$100B in market capitalization).

## Retool

Retool is the fast way to build your own custom internal tools.

## SimplyInsured

SimplyInsured was founded with one mission: to eliminate fear from health insurance. By changing the way small business owners purchase health insurance with our 100% online platform, we're transforming a \$20 billion dollar industry and delighting thousands of customers.

Our unique values-based culture (and extremely talented team) is our core competitive advantage, and each person on our team makes a direct, immediate impact on our business. We value transparency, feedback, bias to action, growth, and an obligation to dissent. Every opinion is respected, we hold each other to extremely high standards, we're driven by the diversity in our backgrounds, and unified by 100% alignment on our mission. What's best for the customer is the heart of everything we do, and our customer stories prove it: by changing health insurance we're literally saving lives.

## Smartcar

At Smartcar, we empower developers to build the future of mobility. Our API allows web and mobile apps to locate and unlock cars using simple HTTP requests. The Smartcar platform is compatible across car brands. It works without aftermarket hardware like OBD dongles. Our customers have built apps for peer-to-peer car sharing, mobile car wash, and fleet management.

## Snackpass

Snackpass is mobile order meets social. We focus on mobile order pickup, not delivery. Our users Snackpass breakfast, lunch, and dinner on a daily basis to save time and not wait in line. Social is our sauce. On Snackpass, you can unlock discounts with friends, send gifts, and collect points. Our users tell us that Snackpass is the most fun way to order food — that other food apps feel formal and boring in comparison.

The future of the restaurant industry is mobile order — see Chipotle, Starbucks, Sweetgreen, Shake Shack. And the future of mobile payments is social. At Snackpass, we've found a way to make both work, packaged in a product that our users love and use on a daily basis.

## Software Data (India) Limited - SDIL

SDIL, a Public Limited Company, has its Head Office in New Delhi, Southern Regional Office at Bangalore, and Business Offices at Pune and Hyderabad. We have a CMMI Version 1.2 Maturity Level 3 compliant Development Centre, doing offshore work for our parent company, besides undertaking software development projects for the domestic clients.

Our Global Group of Companies has been at the heart of many of the Fortune 500 and Blue-Chip companies across the globe by providing innovative IT Solutions that drive their key business operations. Working seamlessly across the globe, we have the experience, expertise, competence and credibility to deliver IT Solutions on time, and on budget.

## Triplebyte

Triplebyte is transforming the way software engineers are hired. Our mission is to build an open, valuable and skills-based credential for all engineers. This is important because millions of people have skills (and deserve good jobs), but don't fit the profile that recruiters seek. We aim to cut out that noise by matching opportunities to people who have the skills to succeed in them - regardless of their background.

Companies like Apple, Dropbox and American Express trust Triplebyte's technical assessment to identify the best engineers for their open roles and reduce the time and effort it takes to hire them.

[We raised a \\$35 million Series B](#) and our team of 64 is growing.

## UnifyID

We live in an era of data breaches and account takeovers (Equifax, Twitter, etc.). The stakes are high, but so are the rewards for innovators who can defend consumers and enterprises against these attacks' consequences. UnifyID has a bold vision to replace today's vulnerable and cumbersome security techniques (passwords, one-time passcodes, etc.) with passive, behavior-based authentication. UnifyID has created the next generation of user authentication that combines behavioral biometrics from smartphones, machine learning, and enterprise-grade cloud services. The result is a highly accurate, frictionless, and secure authentication service that defends against malicious scale attacks on mobile and web experiences.

We are a talented team of security, machine learning, mobile, and enterprise SaaS experts backed by leading investors such as NEA, Andreessen Horowitz, and Stanford-StartX. Our innovations have won numerous awards from TechCrunch, RSA, Gartner, and SXSW. We are seeking passionate, self-motivated individuals who are ready to dive into crafting the future of authentication.

## Wizely

Wizely is building India's first Neo-banking platform dedicated to Financial Wellness for emerging India. Our intelligent digital banking experience helps customers take charge of their everyday finances and reach their financial goals. Wizely delivers not only personalised guidance but also empowers users to make their goals a reality with spending controls, smart saving, and a confident path into borrowing and investments.

Founded in 2017, Wizely is transforming the way new-age banking can guide and serve the Indian consumer, with an engaging, personalised experience at the core.

Our vision is to grow our offerings as our customers progress in their journeys to Financial Wellness. For now, we're excited to pave the way for Financial Wellness for emerging India.

## Zeus

We built Zeus Living so you can feel at home wherever opportunity takes you. Whether it's for a month, a year or sometime in between, you can count on a thoughtfully designed home and a comfortable, easy stay. Our technology helps us select homes you'll love in ideal locations at a good value, while our expert team handles all the details. Backed by Airbnb, Comcast, Bowery and Initialized Capital, Zeus has raised \$90M in funding and is based in San Francisco and operates in the Bay Area, Los Angeles, New York City, Seattle and Washington, D.C. To date, Zeus has hosted more than 17,000 residents for over 500,000 nights. We're hiring [backend](#) and [frontend](#) engineers.

## Company Size: 101-500

## Benchling

Benchling creates software that makes life science research faster & more collaborative. Biotech has the potential to solve humanity's most pressing challenges, such as disease, renewable energy, & hunger. The brightest minds are working on these problems but they are equipped with archaic tools. We aspire to fix this and increase the rate of scientific output with a web-based platform that allows researchers to design & run experiments, analyze data, and share results. Scientists use Benchling for the same reason: to be empowered, not encumbered, by their tools.

## Brex

Brex is building the new global standard for financial services. Our mission is to reimagine financial systems so every growing company can realize its full potential. At our core, we are a tech company, disrupting long-entrenched institutions with better technology and products that serve the needs of our customers. By combining financial services and software tools, we are realizing a vision to be the financial operating system for growing businesses. With backing from top venture firms and Y Combinator, Brex is one of the fastest-growing startups to date!

Tagline: Reimagine financial systems at Brex!

Careers page: <https://www.brex.com/careers/>

## Clever

When we started eight years ago, four schools used Clever. Today, Clever is used by over 78,000 schools, making it the fastest-growing company in education. We're on a mission to make education more equitable & engaging. When great teachers are supported by great technology, it leads to incredible learning outcomes.

If you are interested in the intersection between technology and education, we would love to chat with you about internship and new grad opportunities at Clever! Stop by our virtual booth to talk about one of the following roles with one of our recruiters on Wednesday and/or Thursday!

## Codecademy

Codecademy has helped over 45 million people from around the world upgrade their careers with engaging, accessible, and flexible education on programming and data skills. We provide over 200 hands-on interactive lessons ranging from Python to R to Javascript and everything in between. Our learners have gone on to start companies, new jobs, and new lives thanks to what they've learned with Codecademy, and we're thrilled to be working to take that impact to the next level.

Codecademy was started in 2011 by two college students in a dorm room at Columbia that were frustrated by the huge gap between education and employment. A few years later, we are a rapidly growing, diverse team of 75+ in SoHo, NYC. We've raised over \$40m in venture capital funding from top investors including Union Square Ventures, Kleiner Perkins, Naspers, Y Combinator, and more.

## Mixpanel

At Mixpanel, our mission is to increase the rate of innovation. Not only as a company but for the businesses we serve. Through our analytics platform, companies can analyze how and why their users engage, convert, and retain in real-time across web, mobile, and smart devices. Then they can use that data to improve their business and products.

Mixpanel serves over 26,000 companies from different industries around the world, including Twitter, Expedia, and Uber. Headquartered in San Francisco, Mixpanel has offices in New York, Seattle, Austin, London, Barcelona, and Singapore.

## Nurx

Nurx is the most convenient and affordable way to manage your everyday healthcare needs. We believe healthcare is unconditional and everyone should have the freedom to live well, regardless of your circumstances.

We're growing on a daily basis, expanding our team and offerings. You have the opportunity to make a huge impact that is felt throughout the entire company. New challenges present themselves and we tackle them with rigor and passion.

## Newfront

Newfront is a modern insurance brokerage that leverages technology to vastly simplify the buying process for clients and the selling process for brokers. Our experienced insurance brokers help our clients save money and find the right coverage for their risk. Newfront is one of the fastest-growing retail insurance brokerages in the US.

## Breaking The Glass

Breaking the Glass is a professional networking group which promotes career development for women and supports the growth of female diversity within the workforce. Our concept is simple: provide opportunities through networking, professional development, and support to help create limitless opportunities for all. All of our events are free to attend and there is no membership fee. Through our professional expertise within employment and staffing, we seek to impact change and increase diversity within the US workforce. We implement initiatives within our client base to promote more opportunities for women. We do this by hosting events which include guest speakers, training seminars, workshops, and open forums that discuss topics that are of value to you. This group is not exclusive to women. We encourage male professionals to attend as well, as the topics we discuss are pertinent to all.

## Rippling

Rippling is the first way for businesses to manage their HR & IT — from payroll and benefits, to employee devices and apps — all in one, modern system.

In 90-seconds, a company can onboard a new employee and set up their payroll, health insurance, work computer, and third-party apps like Gmail, Microsoft Office, and Slack. It's the only platform that unifies every employee system, and automates the administrative work behind each.

## Standard Cognition

Grab & go! Autonomous checkout for brick & mortar retailers. <https://standard.ai>

## Company Size: 500+

## Apple

Every new product, service, or feature we invent is the result of people working together to make each other's ideas stronger. That happens here because every one of us strives toward a common goal — creating the best customer experiences. Just one example: The incredibly advanced camera features in every new iPhone are not the result of a few dozen people. They're the product of hundreds of optical technology experts who complement each other's thinking. Multiply that effort across every feature in every Apple product, and you'll get an idea of how important collaboration is here.

## AthenaHealth

Our healthcare system is fragmented; it puts up walls between providers, patient data, and payers, and it's getting harder to break through them. At athenahealth, we are driven by our mission to create a thriving ecosystem that delivers accessible, high quality, and sustainable healthcare for all. We value teamwork and believe that the strength of our team comes from supporting each other, communicating well and leveraging our specialized skills. If you are looking for company that will enable you to work outside of your comfort zone to transform the healthcare ecosystem, athenahealth is the place for you.

## Cambly

Cambly is a live language learning marketplace. We match students with tutors for live 1-on-1 training via video chat. We're ~30 people and growing. We are a profitable series B company headquartered in the SF Bay Area.

We're looking for a senior backend engineer, our first data engineer, and a Head of Design to own product and brand design.

## Dell

Dell Technologies is a unique family of businesses that provides the essential infrastructure for organizations to build their digital future, transform IT and protect their most important asset: information. The company services customers of all sizes across 180 countries – ranging from 98 percent of the Fortune 500 to individual consumers – with the industry's most comprehensive and innovative portfolio from the edge to the core to the cloud.

## Epic

As a global leader in the development of software for healthcare organizations, Epic is driving change for an entire industry – one that affects the quality of life for everyone. Our team collaborates with some of the world's most respected healthcare organizations to improve both individual patient care and the health of entire communities. The challenges we tackle on a day-to-day basis impact the lives of more than 275 million patients worldwide. We're searching for smart, passionate people who want to achieve great things. If you want to be part of something truly important, consider a career at Epic.

## Equinix

Equinix (Nasdaq: EQIX) is the world's digital infrastructure company, enabling digital leaders to harness a trusted platform to bring together and interconnect the foundational infrastructure that powers their success. Equinix enables today's businesses to access all the right places, partners and possibilities they need to accelerate advantage. With Equinix, they can scale with agility, speed the launch of digital services, deliver world-class experiences and multiply their value.

## Google

Google's mission is to organize the world's information and make it universally accessible and useful. Since our founding in 1998, Google has grown by leaps and bounds. From offering search in a single language we now offer dozens of products and services—including various forms of advertising and web applications for all kinds of tasks—in scores of languages. And starting from two computer science students in a university dorm room, we now have thousands of employees and offices around the world. A lot has changed since the first Google search engine appeared. But some things haven't changed: our dedication to our users and our belief in the possibilities of the Internet itself.

## JP Morgan

J.P. Morgan is a leader in financial services, offering solutions to clients in more than 100 countries with one of the most comprehensive global product platforms available. We have been helping our clients to do business and manage their wealth for more than 200 years. Our business has been built upon our core principle of putting our clients' interests first.

## Lyft

At Lyft, we challenge convention, take risks, and make an impact. Our mission is to improve people's lives with the world's best transportation. As an intern at Lyft, you'll take on challenges to change the face of transportation - in cities, with the Lyft app, and beyond. You'll be fully integrated into a team where you'll work on challenging and gratifying projects. Intern cohorts are kept intentionally small and everyone is paired with a mentor. Throughout your time here, you'll be immersed in our welcoming, friendly culture where everyone has a significant impact.

## Mindtree

Mindtree [NSE: MINDTREE] is a global technology consulting and services company, helping enterprises marry scale with agility to achieve competitive advantage. “Born digital,” in 1999 and now a Larsen & Toubro Group Company, Mindtree applies its deep domain knowledge to 290+ enterprise client engagements to break down silos, make sense of digital complexity, and bring new initiatives to market faster.

We enable IT to move at the speed of business, leveraging emerging technologies and the efficiencies of continuous delivery to spur business innovation. Operating in more than 15 countries across the world, we're consistently regarded as one of the best places to work,

embodied every day by our winning culture made up of over 22,000 entrepreneurial, collaborative and dedicated “Mindtree Minds”

## PagerDuty

PagerDuty is the central nervous system for a company’s digital operations. We identify issues and opportunities in real-time and bring together the right people to respond to problems faster and prevent them in the future.

We believe that people do their best in a culture that fosters inclusion, innovation, and success and we are actively hiring for our Career Accelerator Program (CAP)! Whether you’re enrolled in a university, completing a coding bootcamp, or returning to work after a gap in employment, you can get 16 weeks of hands-on experience in a high growth tech company with amazing mentorship and opportunities to grow.

## Palo Alto Networks

Palo Alto Networks, the global cybersecurity leader, is shaping the cloud-centric future with technology that is transforming the way people and organizations operate. Our mission is to be the cybersecurity partner of choice, protecting our digital way of life. We help address the world's greatest security challenges with continuous innovation that seizes the latest breakthroughs in artificial intelligence, analytics, automation, and orchestration. By delivering an integrated platform and empowering a growing ecosystem of partners, we are at the forefront of protecting tens of thousands of organizations across clouds, networks, and mobile devices. Our vision is a world where each day is safer and more secure than the one before. For more information, visit [www.paloaltonetworks.com](http://www.paloaltonetworks.com).

## LinkedIn

Founded in 2003, LinkedIn connects the world's professionals to make them more productive and successful. With more than 675+ million members worldwide, including executives from every Fortune 500 company, LinkedIn is the world's largest professional network. The company has a diversified business model with revenue coming from Talent Solutions, Marketing Solutions, and Premium Subscriptions products. Headquartered in Silicon Valley, LinkedIn has offices across the globe.

## Mitchell Martin

Mitchell Martin, Inc. (MMI) is a family of companies supporting the growth of both people and businesses through talent acquisition services. Since 1984, we've been helping people find the best opportunities in information technology, healthcare and other fields throughout the United States. We are a dedicated group of individuals, powered by innovation and driven by integrity, working with diverse clients in industries such as finance, insurance, healthcare, travel and media.

To stay ahead of the latest technology developments and trends, MMI has built practice groups around the most in-demand technologies, such as SAP, Salesforce, Cybersecurity, and AI. This expertise allows us to more clearly understand the demands and fluctuations of these areas and provide guidance to both clients and candidates.

Our proven recruitment, assessment, and selection methods ensure that we find the best match for both sides of the equation. We go beyond the initial hire and create meaningful partnerships to support you throughout your career journey.

## Oracle

We're a cloud technology company that provides organizations around the world with computing infrastructure and software to help them innovate, unlock efficiencies and become more effective. We also created the world's first – and only – autonomous database to help organize and secure our customers' data.

Oracle Cloud Infrastructure offers higher performance, security, and cost savings. It is designed so businesses can move workloads easily from on-premises systems to the cloud, and between cloud and on-premises and other clouds. Oracle Cloud applications provide business leaders with modern applications that help them innovate, attain sustainable growth, and become more resilient.

## Red Ventures

Founded in 2000, Red Ventures employs 3,000+ people in 10 cities across the US, Puerto Rico, Brazil, and the UK. We're made up of dozens of nimble business teams focused on raising the bar, giving back, and challenging what's possible.

Through our portfolio of influential brands, digital platforms, and strategic partnerships, we empower people to make confident decisions about things that matter most to them, whether it's strengthening their mental and physical health, investing, moving, pursuing higher education, traveling the world, or discovering new entertainment.

## Roku, Inc

Roku pioneered streaming to the TV. We connect users to the streaming content they love, enable content publishers to build and monetize large audiences, and provide advertisers with unique capabilities to engage consumers.
